A fresh fall harvest of the latest pediatric datasets

DATE OF RELEASE: OCTOBER 29, 2026

Version 1.5.11 of the Childhood Cancer Data Initiative Data Catalog adds 16new datasets and one new resource: the Zero Childhood Cancer registry. Additional changes of note include the updated resource name for Innovative Therapies for Children with Cancer (ITCC) to allow for multiple datasets and the removal of the Molecular Targets Platform (MTP) following its recent retirement. The User Guide is current with version 1.5.11 updates.

Statistics at a Glance

v1.5.11 Summary

- **37th** Release
- **557** Datasets
- **164** Resources
  - **25** Analytical Tools
  - **9** Biorepositories
  - **8** Catalogs
  - **22** Data Repositories
  - **4** Knowledgebases
  - **32** Programs
  - **3** Projects
  - **61** Registries

Data Updates

New Resources and Datasets

1 new resource has been added.

- Zero Childhood Cancer
  - **New Dataset** – ZERO Database

Existing Participating Resources and Datasets

14 existing resources have been updated with additional data and information.

- CCDI cBioPortal Cancer Data Explorer
  - **New Dataset** – CCSS Therapy-Related Mutational Signatures in Subsequent Neoplasms
  - **New Dataset** – Genomic Sequencing of Pediatric Cancer Cases (CMRI/KUCC)
  - Updated dataset Molecular Characterization Initiative
- Childhood Cancer Data Initiative (CCDI)

    - **New Dataset** – Childhood Cancer Data Initiative (CCDI): Frameshift Mutation Profiling of Constitutional Mismatch Repair Deficiency Syndrome Patients
    - **New Dataset** – Kids First: Genomic Analysis of Pediatric Rhabdomyosarcoma
    - **New Dataset** – Kids First: Childhood Cancer Data Initiative (CCDI) - Discovering the Timing and Origins of Bone and Soft Tissue Cancers
- The database of Genotypes and Phenotypes (dbGaP)
    - **New Dataset** – CIDR: Understanding the Increased Risk of Childhood Acute Lymphoblastic Leukemia in Latinos
    - **New Dataset** – Longitudinal Single-Cell RNA Sequencing Reveals Evolution of Micro- and Macro-States in Chronic Myeloid Leukemia
    - **New Dataset** – NCTN: Risk-Stratified Therapy for Acute Myeloid Leukemia in Down Syndrome (AAML1531)
    - **New Dataset** – NCTN: Phase III Randomized Trial of Single vs. Tandem Myeloablative Consolidation Therapy for High-Risk Neuroblastoma (ANBL0532)
    - **New Dataset** – NCTN: Treatment of Atypical Teratoid/Rhabdoid Tumors (AT/RT) of the Central Nervous System with Surgery, Intensive Chemotherapy, and 3-D Conformal Radiation (ACNS0333)
    - **New Dataset** – NCTN: Response- and Biology-Based Therapy for Intermediate-Risk Neuroblastoma (ANBL0531)
    - **New Dataset** – NCTN: Treatment for Very Low and Standard Risk Favorable Histology Wilms Tumor (AREN0532)
    - **New Dataset** – NCTN: A Non-Randomized Phase III Study of Response Adapted Therapy for the Treatment of Children with Newly Diagnosed High Risk Hodgkin Lymphoma (AHOD0831)
- Genomic Data Commons (GDC)
    - **New Dataset** – Applied Proteogenomics Organizational Learning and Outcomes (APOLLO)
    - Updated dataset Clinical Proteomic Tumor Analysis Consortium (CPTAC)
- Human Cancer Models Initiative
    - Updated counts
- Imaging Data Commons (IDC)
    - Updated dataset CCDI Molecular Characterization Initiative
- Innovative Therapies for Children with Cancer (ITCC)
    - **New Dataset** – ITCC Pediatric Cancer Data Portal
    - Updated digest and program name from “Innovative Therapies for Children with Cancer Paediatric Preclinical Proof-of-Concept Platform (ITCC-P4)” to “Innovative Therapies for Children with Cancer” to reflect inclusion of multiple datasets
- Molecular Targets Platform (MTP)
    - Removed following resource retirement
- Norwegian Childhood Cancer Biobank (NCCB)
    - Added publication
- St. Jude Cloud
    - **New Dataset** – Pediatric Brain Tumors: Patient-derived orthotopic xenografts and Tumoroid Models
    - Updated clinical trial identifier for dataset Genomes 4 Kids
- Swedish Childhood Tumor Biobank
    - Added data elements

- The Cancer Imaging Archive (TCIA)
  - Added dbGaP study identifiers to datasets Radiation Therapy, Amifostine, and Chemotherapy in Treating Young Patients With Newly Diagnosed Nasopharyngeal Cancer (ARAR0331) and Annotations for Radiation Therapy, Amifostine, and Chemotherapy in Treating Young Patients With Newly Diagnosed Nasopharyngeal Cancer Collection (ARAR0331-Tumor-Annotations)
- Victorian Paediatric Cancer Consortium (VPCC)
- Updated counts
- VIVO Biobank
- Updated counts

General Site Updates

- Appendix A of the User Guide was updated to reflect resource addition, removal, and update dates.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

A late summer bloom of pediatric data

DATE OF RELEASE: AUGUST 31, 2026

Version 1.5.10 of the Childhood Cancer Data Initiative Data Catalog includes over 70 new resources and 91 new datasets from new and existing resources. Additional changes to existing resources include updated counts, references, resource descriptions, clinical trial identifiers, dbGaP identifiers, data repository links, and clinical trial lists. The User Guide is current with version 1.5.10 updates.

Statistics at a Glance

v1.5.10 Summary

- **36th** Release
- **541** Datasets
- **164** Resources
  - **25** Analytical Tools
  - **9** Biorepositories
  - **8** Catalogs
  - **22** Data Repositories
  - **5** Knowledgebases
  - **32** Programs
  - **3** Projects
  - **60** Registries

Data Updates

New Resources and Datasets

75 new resources have been added.

- African Cancer Registry Network
  - **New Dataset** – AFCRN Database
- Alaska Native Tumor Registry
  - **New Dataset** – Cancer in Alaska Native People: 1969-2023
- Australian Cancer Database
  - **New Dataset** – Cancer Data in Australia 2025
- Australian Childhood Cancer Registry
  - **New Dataset** – Australian Childhood Cancer Registry
- Australian Particle Therapy Clinical Quality Registry
  - **New Dataset** – Australian Particle Therapy Clinical Quality Registry
- Austrian National Cancer Registry
  - **New Dataset** – Cancer in Austria 2024
  - California Cancer Registry

- **New Dataset** – California Cancer Registry
- Cancer Survivor Program
  - **New Dataset** – Yield of Urinalysis Screening in Pediatric Cancer Survivors
- Cantonal Hospital Aarau
  - **New Dataset** – Young Survivors at KSA: registry for standardised assessment of long-term and late-onset health events in survivors of childhood and adolescent cancer-a study protocol
- Croatian Cancer Registry
  - **New Dataset** – Croatian Cancer Registry
- Cyprus Cancer Registry
  - **New Dataset** – Cyprus Cancer Registry 2016
- Delhi Cancer Registry
  - **New Dataset** – Delhi Cancer Registry
- Dutch Childhood Cancer Survivor Study
  - **New Dataset** – Dutch Childhood Cancer Survivor Study
- Estonian Cancer Registry
  - **New Dataset** – Estonian Cancer Registry
- EUROpean CAncer Registry
  - **New Dataset** – Eurocare 5
- European Network of Cancer Registries
  - **New Dataset** – European Network of Cancer Registries
- Finnish Cancer Registry
  - **New Dataset** – Finnish Cancer Registry
- French National Registry of Childhood Cancers
  - **New Dataset** – French National Registry of Childhood Cancers
- Georgia Comprehensive Cancer Registry
  - **New Dataset** – Childhood Cancer Incidence Rates for the State of Georgia, 2014-2023
- German Childhood Cancer Registry
  - **New Dataset** – German Childhood Cancer Registry
- Girona Population Cancer Registry
  - **New Dataset** – Incidence and survival of central nervous system tumors in childhood and adolescence in Girona (Spain) 1990-2013
- Gliomatosis Cerebri Registry
  - **New Dataset** – Gliomatosis Cerebri Registry
- Global nLPHL One Working Group
  - **New Dataset** – Global nLPHL One Working Group
- Greater Bay Area Cancer Registry
  - **New Dataset** – Greater Bay Area Cancer Registry
- Hematology Cancer Consortium
  - **New Dataset** – Indian Acute Leukaemia Research Database
- HIT-MED
  - **New Dataset** – HIT-MED
- Hodgkin Lymphoma International Study for Individual Care
  - **New Dataset** – Hodgkin Lymphoma International Study for Individual Care

- Hungarian Pediatric Oncology Network
  - **New Dataset** – Hungarian Childhood Cancer Registry
- INdividualized therapy FOr high-Risk childhood Malignancies
  - **New Dataset** – The Pediatric Precision Oncology INFORM Registry: Clinical Outcome and Benefit for Patients with Very High-Evidence Targets
- The International Pleuropulmonary Blastoma/DICER1 Registry
  - **New Dataset** – The International Pleuropulmonary Blastoma/DICER1 Registry
- Iranian National Population-based Cancer Registry
  - **New Dataset** – Epidemiology and geographical patterns of common childhood cancers in Iran: Evidence from the National Cancer Registry
- Iraqi Ministry of Health
  - **New Dataset** – Iraqi Cancer Registry 2021
- Israel Cancer Registry
  - **New Dataset** – Israel Cancer Registry
- Italian Association for the fight against Neuroblastoma ETS
  - **New Dataset** – Italian Neuroblastoma Registry
- Italian Association of Cancer Registries
  - **New Dataset** – Cancer Numbers in Italy 2023
- Italian Association of Pediatric Hematology, Oncology, and Science
  - **New Dataset** – Italian Association of Pediatric Hematology, Oncology, and Science
- Japan Neurosurgical Society
  - **New Dataset** – Brain Tumor Registry of Japan (2001-2004)
- King Hussein Cancer Center
  - **New Dataset** – KHCC Cancer Registry
- Korea National Cancer Center
  - **New Dataset** – Cancer Incidence and Survival among Adolescents and Young Adults in Korea: An Update for 2016
- LOGGIC Core BioClinical Database
  - **New Dataset** – LOGGIC Core BioClinical Database
- Malignant Endocrine Tumors Registry
  - **New Dataset** – Malignant Endocrine Tumors Registry
- Malta National Cancer Registry
  - **New Dataset** – Malta National Cancer Registry Report 2025
- Massachusetts Cancer Registry
  - **New Dataset** – Cancer Incidence and Mortality in Massachusetts 2017-2021
- Montana Central Tumor Registry
  - **New Dataset** – Montana Central Tumor Registry Annual Report 2025
- National Cancer Database
  - **New Dataset** – National Cancer Database
- National Cancer Registry Ireland
  - **New Dataset** – Annual Statistical Report 2024
- National Cancer Registry of Japan
  - **New Dataset** – National Cancer Registry of Japan

- National Cancer Registry of Ukraine
  - **New Dataset** – National Cancer Registry of Ukraine
- National Network for the Management of Rare Peritoneal Tumors
  - **New Dataset** – National Network for the Management of Rare Peritoneal Tumors
- Netherlands Cancer Registry
  - **New Dataset** – Netherlands Cancer Registry
- Neurofibromatosis Registry
  - **New Dataset** – Characterization and utilization of an international neurofibromatosis web-based, patient-entered registry: An observational study
- New Zealand Children's Cancer Registry
  - **New Dataset** – NZCCR Snapshot 2021
- The Nordic Society of Paediatric Haematology and Oncology Biobank
  - **New Dataset** – NOPHO Leukemia Biobank
- North Carolina Central Cancer Registry
  - **New Dataset** – 2022 Cancer Incidence and Mortality in North Carolina
- Northern Ireland Cancer Registry
  - **New Dataset** – All cancers (ex NMSC) among children 1993-2023
  - **New Dataset** – All cancers (ex NMSC) among young adults 1993-2023
- Norwegian Institute of Public Health
  - **New Dataset** – Cancer In Norway 2024
- Osaka Cancer Registry
  - **New Dataset** – Osaka Cancer Registry
- Pediatric Oncology Group of Ontario Networked Information System
  - **New Dataset** – Pediatric Oncology Group of Ontario Networked Information System 2020
- PMGH Childhood Cancer Registry
  - **New Dataset** – PMGH Childhood Cancer Registry
- Portugal National Cancer Registry
  - **New Dataset** – National Cancer Registry 2010
- Saudi Health Council National Cancer Center
  - **New Dataset** – Saudi Cancer Registry 2024
- Secured Access to Innovative Medicines for Children with Cancer
  - **New Dataset** – SACHA-France
- Slovenian Cancer Registry
  - **New Dataset** – Cancer in Slovenia 2022
- South African National Cancer Registry
  - **New Dataset** – Childhood Cancer Registry 2021 Annual Report
- Spanish Academy of Dermatology and Venereology
  - **New Dataset** – Primary cutaneous lymphomas in children: A prospective study from the Spanish Academy of Dermatology and Venereology (AEDV) Primary Cutaneous Lymphoma Registry
- Spanish Network of Cancer Registries
  - **New Dataset** – Spanish Network of Cancer Registries
- Sweden National Cancer Registry

    - **New Dataset** – Cancer Report 2024
- Swiss Childhood Cancer Registry
    - **New Dataset** – Swiss Childhood Cancer Registry
- Taiwan Cancer Registry
    - **New Dataset** – Taiwan Cancer Registry
- Tanzania - Mwanza Cancer Registry
    - **New Dataset** – Cancer incidence and treatment utilization patterns at a regional cancer center in Tanzania from 2008-2016: Initial report of 2,772 cases
- Tasmanian Cancer Registry
    - **New Dataset** – Tasmanian Cancer Registry
- Texas Cancer Registry
    - **New Dataset** – Adolescent and Young Adult (AYA) Cancer, Texas 2019-2023
    - **New Dataset** – Childhood and Adolescent Cancer, Texas 2014-2023
- Utah Cancer Registry
    - **New Dataset** – Cancer in Utah: Incidence and Mortality Statistics through 2021
- Yorkshire Specialist Register of Cancer in Children and Young People
    - **New Dataset** – Data Resource Profile: Yorkshire Specialist Register of Cancer in Children and Young People (Yorkshire Register)
- Zurich Cancer Registry
    - **New Dataset** – Zurich Cancer Registry

Existing Participating Resources and Datasets

14 existing resources have been updated with additional data and information.

- Cancer Epidemiology Descriptive Cohort Database
    - Updated counts
- Cancer Genome Characterization Initiative
    - Updated counts for dataset Burkitt Lymphoma Genome Sequencing Project
- cBioPortal for Cancer Genomics
    - **New Dataset** – MSK-IMPACT 50K Clinical Sequencing Cohort
    - **New Dataset** – Pediatric Acute Myeloid Leukemia
    - **New Dataset** – The Angiosarcoma Project - Count Me In
    - **New Dataset** – Pediatric Low-Grade Glioma
    - Updated dataset Ewing Sarcoma MSK
- CCDI cBioPortal Cancer Data Explorer
    - **New Dataset** – NCI-COG Pediatric MATCH Precision Medicine Clinical Trial
    - Updated counts and reference for dataset Molecular Characterization Initiative
- Childhood Cancer Data Initiative (CCDI)
    - **New Dataset** – Whole Genome Landscapes of Patient Derived Osteosarcoma Xenograft Models
    - **New Dataset** – A Cohort of Hispanic Children with Acute Lymphoblastic Leukemia; Bloom Syndrome in a Mexican American Family with Rhabdomyosarcoma
    - **New Dataset** – Single Cell RNA Sequencing of Metastatic Adrenocortical Carcinoma and Tumor-Free Tissue

    - Updated dataset Molecular Characterization Initiative
- Gene Expression Omnibus
    - **New Dataset** – Acute myeloblastic leukemia cells response to all trans retinoic acid and valproic acid
- NCTN Navigator
    - Updated counts
- NF Data Portal
    - **New Dataset** – Processed RNA-seq STAR Salmon outputs
    - **New Dataset** – Processed Somatic Variants - Strelka Pipeline
    - **New Dataset** – Processed Somatic Genomic Variants - Mutect2 Pipeline
    - Updated Clinical Trial Identifier for dataset ADVL1521 Omic Data Repository
- PDX INSIGHTS
    - Updated counts
- Pediatric Malignancies: Inventory of DCEG Research
    - Added Data Repository link and Clinical Trial Identifier for dataset Pediatric Proton and Photon Therapy Comparison Cohort
- Pediatric MATCH
    - Deleted Clinical Trial List link (non-functional)
- Single-cell Pediatric Cancer Atlas
    - Updated resource description
    - Updated references for multiple datasets
- The Cancer Imaging Archive
    - **New Dataset** – A Normative Dataset of Healthy Pediatric Cranial Computed Tomography (CT) Images
    - Updated dbGaP identifier for dataset Risk-Based Therapy in Treating Younger Patients With Newly Diagnosed Liver Cancer (AHEP0731)
    - Updated dbGaP identifier for dataset Annotations for Risk-Based Therapy in Treating Younger Patients With Newly Diagnosed Liver Cancer (AHEP0731-Tumor-Annotations)
- World Health Organization - International Agency for Research on Cancer
    - **New Dataset** – Northern Africa, Central and Western Asia Hub
    - Updated counts for dataset Childhood Cancer and Leukemia International Consortium

General Site Updates

- A standard warning banner for Government system access was added.
- Appendix A of the User Guide was updated to reflect resource update dates and add new resources.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

New data just in time for summer

DATE OF RELEASE: JUNE 10, 2026

Version 1.5.9 of the Childhood Cancer Data Initiative Data Catalog includes 6 new resources with new datasets, 15 new datasets from existing resources, and some added links to analytic tools in existing resources. Changes to content, color contrast, and alt text were made to the About CCDI Catalog page for improved accessibility and 508 compliance. The User Guide is current with version 1.5.9 updates and relevant terms were added to the Glossary.

Statistics at a Glance

v1.5.9 Summary

- **35th** Release
- **450** Datasets
- **89** Resources
  - **25** Analytical Tools
  - **8** Biorepositories
  - **8** Catalogs
  - **22** Data Repositories
  - **5** Knowledgebases
  - **15** Programs
  - **1** Project
  - **5** Registries

Data Updates

New Resources and Datasets

6 new resources have been added.

- Bio Medical Evidence Graph
  - **New Dataset** – Bio Medical Evidence Graph
- Cancer Complexity Knowledge Portal
  - **New Dataset** – Cancer Complexity Knowledge Portal
- Chernobyl Tissue Bank
  - **New Dataset** – Chernobyl Tissue Bank
- Cooperative Human Tissue Network
  - **New Dataset** – Cooperative Human Tissue Network
- European Genome-phenome Archive (EGA)
  - **New Dataset** – European Genome-phenome Archive
- Surveillance, Epidemiology, and End Results Program (SEER)
  - **New Dataset** – Surveillance, Epidemiology, and End Results Program

Existing Participating Resources and Datasets

12 existing resources have been updated with additional data and information.

- Cancer Dependency Map
  - Added Analytic Tool links
- Childhood Cancer Data Initiative (CCDI)
  - **New Dataset** – Childhood Cancer Data Initiative (CCDI): Admixture Analysis of Acute Lymphoblastic Leukemia in African American Children: The ADMIRAL Study
- The database of Genotypes and Phenotypes (dbGaP)
  - **New Dataset** – Feasibility of Circulating 5-Hydroxymethylcytosine Profiling in Osteosarcoma
- Gene Expression Omnibus
  - **New Dataset** – Mouse alveolar rhabdomyosarcoma and wild-type skeletal muscle
  - **New Dataset** – Mouse Models of Alveolar/Embryonal Rhabdomyosarcoma & Spindle Cell Sarcomas
  - **New Dataset** – Sequencing of canine and genetically-engineered mouse models for endotype identification of embryonal rhabdomyosarcoma
  - **New Dataset** – Probabilistic modeling of personalized drug combinations from integrated chemical screen and molecular data in sarcoma
  - **New Dataset** – Histone deacetylase inhibitors in alveolar rhabdomyosarcoma
  - **New Dataset** – Dynamic Pax3:Foxo1a expression of alveolar rhabdomyosarcoma
  - **New Dataset** – Bromodomain 4 inhibition leads to MYCN downregulation in Wilms' tumor cells
- Genomic Data Commons (GDC)
  - Added Analytic Tool links to The Cancer Genome Atlas (TCGA)
- Genomics Evidence Neoplasia Information Exchange (GENIE)
  - **New Dataset** – BioPharma Collaborative Breast Cancer v1.0 public
  - **New Dataset** – GENIE Cohort v19.0-public
  - Removed Dataset – GENIE Cohort v18.0-public
- National Institute for Communicable Diseases (NICD) - National Cancer Registry
  - **New Dataset** – NCR Report 2024
  - Removed Dataset – Childhood Cancer Registry Report (2020)
- PDX Development and Trial Centers Research Network
  - Added Data Repository link to PDXNet Portal PDMR Data
- Pediatric Cancer Data Commons (PCDC)
  - Updated counts for International Neuroblastoma Risk Group (INRG) and Malignant Germ Cell International Consortium (MaGIC) datasets
- Pediatric Malignancies: Inventory of DCEG Research
  - **New Dataset** – Analysis Tools
- The Cancer Proteome Atlas (TCPA)
  - Added Analytic Tool link
- Treehouse Childhood Cancer Initiative
  - **New Dataset** – Tumor Compendium 25.01 PolyA (January 2025)
  - **New Dataset** – Tumor Compendium 25.01 Ribodeplete (January 2025)

General Site Updates

- The About CCDI Catalog page was updated with improved color contrast, added alt text, and text edits for improved 508 compliance.
- Appendix A of the User Guide was updated to reflect resource update dates and add new resources.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

Bring on spring with new data and resources

DATE OF RELEASE: APRIL 23, 2026

Version 1.5.8 of the Childhood Cancer Data Initiative Data Catalog adds 15 new resources and 4 new datasets from existing resources: the annual CBTRUS 2025 update, the CCDI ecDNA PDX Cohort from the Childhood Cancer Catalog of Circular Extrachromosomal DNA (ecDNA), the BoneMarrowWSI-PediatricLeukemia dataset in the Imaging Data Commons (IDC), and the BraTS-PEDs dataset in the Cancer Imaging Archive (TCIA). Other resource updates include updates to counts, grant information, publications, a dataset repository link, and the addition of a clinical trial list. The User Guide is current with version 1.5.8 updates.

Edited 6/10/2026 to correct typo and missing dataset in 1.5.8 introductory paragraph

Statistics at a Glance

v1.5.8 Summary

- **34th** Release
- **431** Datasets
- **83** Resources
  - **24** Analytical Tools
  - **6** Biorepositories
  - **8** Catalogs
  - **21** Data Repositories
  - **4** Knowledgebases
  - **14** Programs
  - **1** Project
  - **5** Registries

Data Updates

New Resources

15 new resources have been added.

- AttentionAML
- BARDI
- Cancer Data Standards Registry and Repository (caDSR)
- EwS-Pacbio
- Framework for Exploring Scalable Computational Oncology (FrESCO)
- GWAS Explorer
- MCI_JSON2TSV

- Methylscape
- M-PACT
- NCCR Treatment Database
- Pediatric Molecular Target Lists (PMTL)
- RanBALL
- Spatial Transcriptomics Quantification (STQ)
- Tucan
- WSI Informative Slide Selection

Existing Participating Resources and Datasets

8 existing resources have been updated with additional data and information.

- All of Us
  - Updated counts
- CBTRUS
  - **New Dataset** – CBTRUS 2025
- CCDI cBioPortal Cancer Data Explorer
  - Added publication
  - Updated dataset repository link – OpenPedCan
- Childhood Cancer Catalog of Circular Extrachromosomal DNA (ecDNA)
  - **New Dataset** – CCDI ecDNA PDX Cohort
  - Renamed Childhood Cancer Catalog of Circular Extrachromosomal DNA dataset to CCDI ecDNA Tumor Cohort
- Clinical Interpretation of Variants in Cancer (CIViC)
  - Updated grants
  - Added clinical trial list
- Imaging Data Commons (IDC)
  - **New Dataset** – BoneMarrowWSI-PediatricLeukemia
- The Cancer Imaging Archive (TCIA)
  - **New Dataset** – BraTS-PEDs
- Victorian Paediatric Cancer Consortium (VPCC)
  - Updated counts

General Site Updates

- Appendix A of the User Guide was updated to reflect resource update dates and add new resources.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

New year, same flourishing CCDI Data Catalog

DATE OF RELEASE: FEBRUARY 19, 2026

The first release of the Childhood Cancer Data Initiative Data Catalog in 2026 is overflowing with new resources, new datasets, and updates to existing resources and datasets. New resources added to version 1.5.7 include the CONCORD*Explorer, NF Data Portal, and scMINER, boasting a combined 16 new datasets. 32 new datasets have also been added to six existing resources with notable additions to cBioPortal, Gene Expression Omnibus (GEO), and dbGaP. Eight additional studies have been updated with respect to counts, dbGaP accessions, or references, and PDX AIM was renamed to PDX INSIGHTS. Functional enhancements include the addition of “Available Files” links to download clinical data for more TARGET datasets and updates to the Participating Resources page to adhere to 508 compliance best practices. The User Guide was updated to reflect version 1.5.7 changes.

Statistics at a Glance

v1.5.7 Summary

- **33rd** Release
- **412** Datasets
- **68** Resources
  - **11** Analytical Tools
  - **6** Biorepositories
  - **8** Catalogs
  - **20** Data Repositories
  - **3** Knowledgebases
  - **14** Programs
  - **1** Project
  - **5** Registries

Data Updates

New Resources

3 new resources have been added.

- CONCORD*Explorer
  - **New Dataset** – CONCORD*Explorer
- NF Data Portal
  - **New Dataset** – ADVL1521 Omic Data Repository
  - **New Dataset** – Nucleotide Variants - Columbia University NF1 Glioma Project
  - **New Dataset** – Copy Number Variation Data from the Columbia University NF1 Glioma Project
  - **New Dataset** – Methylation Data from the Columbia University NF1 Glioma Project

    - **New Dataset** – WholeGenomeVariants - Columbia University NF1 Glioma Project
    - **New Dataset** – Bulk RNA-sequencing of Johns Hopkins NF1 Biospecimen Repository cohort
    - **New Dataset** – Whole exome sequencing of Johns Hopkins NF1 Biospecimen Repository cohort
    - **New Dataset** – MPNST Cell Line Methylation Arrays
    - **New Dataset** – MPNST Cell Line SNP Arrays
    - **New Dataset** – MPNST Cell Line Whole Exome Sequencing
    - **New Dataset** – MPNST Cell Line Whole Genome Sequencing
    - **New Dataset** – Synodos LGG Methylation Arrays
    - **New Dataset** – Synodos LGG RNAseq
    - **New Dataset** – Synodos LGG Whole Genome Sequencing (bam)
- scMINER
    - **New Dataset** – scMINER Portal

Existing Participating Resources and Datasets

14 existing resources have been updated with additional data and information.

- Cancer Epidemiology Descriptive Cohort Database (CEDCD)
    - Updated counts
- cBioPortal for Cancer Genomics
    - **New Dataset** – Pediatric solid tumor PDXs
    - **New Dataset** – Schwannoma (Children's Tumor Foundation)
    - **New Dataset** – Cancer Cell Line Encyclopedia
    - **New Dataset** – Colorectal Cancer- ChangKang Project
    - **New Dataset** – Cancer Cell Line Encyclopedia (Genentech)
    - **New Dataset** – Solitary Fibrous Tumors
- CCDI cBioPortal Cancer Data Explorer
    - **New Dataset** – Open Pediatric Cancer (OpenPedCan) Project v15
    - **New Dataset** – Pediatric solid tumor PDXs (UTHSA)
    - Updated dataset – Molecular Characterization Initiative
- Childhood Cancer Data Initiative (CCDI)
    - **New Dataset** – Childhood Cancer Data Initiative (CCDI): Metastatic Osteosarcoma Spatial Profiling
    - Updated dataset – Childhood Cancer Data Initiative (CCDI): Molecular Characterization Initiative
- The database of Genotypes and Phenotypes (dbGaP)
    - **New Dataset** – Enabling Whole Genome Sequencing Analysis from FFPE Specimens in Clinical Oncology
    - **New Dataset** – A Genome-Wide Association Study (GWAS) of Risk for Osteosarcoma
    - **New Dataset** – Oncogenomics of Malignant Peripheral Nerve Sheath Tumors
    - **New Dataset** – Pancreatitis after Treatment for Acute Lymphoblastic Leukemia (SJIRB XPD04-123 and XPD05-078)
    - **New Dataset** – Temporal and Clonal Progression in Pediatric Ependymoma

    - **New Dataset** – Low mutation burden and frequent loss of CDKN2A/B and SMARCA2, but not PRC2, define pre-malignant neurofibromatosis type 1-associated atypical neurofibromas
    - **New Dataset** – Cancer Moonshot Biobank
    - **New Dataset** – PEDS-PLAN - Pediatric Precision Laboratory Advanced Neuroblastoma Therapy
    - **New Dataset** – Study of Leukemia Stem Cells in B-ALL
    - **New Dataset** – Pharmacogenomics of Mercaptopurine Intolerance in Children with Acute Lymphoblastic Leukemia (AALL03N1)
- Gene Expression Omnibus (GEO)
    - **New Dataset** – OTX2 drives medulloblastoma proliferation via direct regulation of cell cycle genes and inhibits differentiation
    - **New Dataset** – Pre-Neoplastic Stage of Medulloblastoma
    - **New Dataset** – Expression profiling of GATA-1 wild type and mutant fetal megakaryocytes
    - **New Dataset** – Discovery of novel recurrent mutations and rearrangements in early T-cell precursor acute lymphoblastic leukemia by whole genome sequencing
    - **New Dataset** – An Animal Model of Myc-driven medulloblastoma
    - **New Dataset** – Novel mutations target distinct subgroups of medulloblastoma
    - **New Dataset** – TH-MYCN Mice with Caspase-8 Deficiency Develop Advanced Neuroblastoma with Bone Marrow Metastasis
    - **New Dataset** – Novel Oncogenic PDGFRA Mutations in Pediatric High-Grade Gliomas
    - **New Dataset** – Lin28 sustains early renal progenitors and induces Wilms tumor
    - **New Dataset** – Therapeutic potential of spleen tyrosine kinase inhibition for treatment of high-risk precursor B-cell acute lymphoblastic leukemia
    - **New Dataset** – Robustness of gene expression signatures in leukemia: comparison of three distinct total RNA preparation procedures
- Genomic Data Commons (GDC)
    - **New Dataset** – Adjuvant Lung Cancer Enrichment Marker Identification and Sequencing Trials (ALCHEMIST)
    - **New Dataset** – Refractory Cancer (RC) Program
    - Updated dataset – Clinical Proteomic Tumor Analysis Consortium (CPTAC)
    - Updated dataset – Human Cancer Models Initiative (HCMI)
- Genomics Evidence Neoplasia Information Exchange (GENIE)
    - Added dbGaP accession to GENIE Cohort v18.0-public
- Kids First Data Resource
    - Added dbGaP accession to Kids First: Novel Cancer Susceptibility in Families (from BASIC3)
- National Clinical Trials Network (NCTN) Navigator
    - Updated counts
- PedcBioPortal for Integrated Childhood Cancer Genomics
    - Updated counts
- PDX INSIGHTS
    - Renamed from "PDX AIM"
    - Updated counts
- Single-cell Pediatric Cancer Atlas Portal (ScPCA)

    - Updated reference – Single-cell gene expression and cytosine modification profiling in pediatric central nervous system tumors
- Therapeutically Applicable Research To Generate Effective Treatments (TARGET)
    - Added available files for:
    - Acute Lymphoblastic Leukemia (ALL) Pilot Phase 1
    - Acute Lymphoblastic Leukemia (ALL) Expansion Phase 2 and Acute Leukemias of Ambiguous Lineage (ALAL) Phase 3
    - Acute Myeloid Leukemia (AML)
    - Cancer Model Systems (MDLS): NBL and Pediatric Preclinical Testing Program (PPTP)

General Site Updates

- Participating Resources color contrast and scrolling were updated for improved 508 compliance.
- Appendix A of the User Guide was updated to reflect resource update dates and add the new resource.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

2025 Final Countdown

DATE OF RELEASE: DECEMBER 4, 2025

The latest release of the Childhood Cancer Data Initiative Data Catalog features the annual update to the GENIE dataset, one additional updated dataset, and a new resource with a new dataset – Pediatric Cancer Registry from the Florida Association of Pediatric Tumor Programs (FAPTP). The Glossary page was updated to adhere to 508 compliance best practices and a new field was added to the resource digests to distinguish between person and website contacts for each resource. The User Guide was updated to reflect the added resource and other update dates for version 1.5.6.

Statistics at a Glance

v1.5.6 Summary

- **32nd** Release
- **364** Datasets
- **65** Resources
  - **9** Analytical Tools
  - **6** Biorepositories
  - **8** Catalogs
  - **19** Data Repositories
  - **3** Knowledgebases
  - **14** Programs
  - **1** Project
  - **5** Registries

Data Updates

New Resources

1 new resource has been added.

- Florida Association of Pediatric Tumor Programs (FAPTP)
  - **New Dataset** – Pediatric Cancer Registry

Existing Participating Resources and Datasets

4 existing resources have been updated with additional data and information or with datasets removed.

- Childhood Cancer Data Initiative (CCDI)
  - Updated dataset – Childhood Cancer Data Initiative (CCDI): Molecular Characterization Initiative
- The database of Genotypes and Phenotypes (dbGaP)
  - Moved dataset Gabriella Miller Kids First Pediatric Research Program in Novel Cancer Susceptibility in Families (from BASIC3) to Kids First Data Resource

- Genomics Evidence Neoplasia Information Exchange (GENIE)
  - Dataset GENIE Cohort v17.0-public was replaced by dataset GENIE Cohort v18.0-public
- Kids First Data Resource
  - Moved dataset Gabriella Miller Kids First Pediatric Research Program in Novel Cancer Susceptibility in Families (from BASIC3) from dbGaP and updated counts

General Site Updates

- A new property, “Resource Contact URL,” was added to the digests to distinguish between the cases when the resource contact is an email or a website. UI logic was updated accordingly to display the appropriate label for the contact type.
- Glossary page color contrast and scrolling were updated for improved 508 compliance.
- Appendix A of the User Guide was updated to reflect resource update dates and add the new resource.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

Forging ahead in fall

DATE OF RELEASE: NOVEMBER 19, 2025

Version 1.5.5 of the Childhood Cancer Data Initiative Data Catalog features dataset updates to counts, disease lists, publications, and URLs, and one new dataset – Childhood Cancer Data Initiative (CCDI): Texas Pediatric Patient Derived Xenograft. Two pages were updated for 508 best practices, and some additional stylistic updates were made to provide a more consistent experience for users. The "Site Updates" page was renamed "Release Notes" to better describe the information displayed there and improvements were made to the organization and description of some of the page contents and features. The User Guide was updated to reflect the latest resource update dates.

Statistics at a Glance

v1.5.5 Summary

- **31st** Release
- **363** Datasets
- **64** Resources
  - **9** Analytical Tools
  - **6** Biorepositories
  - **8** Catalogs
  - **19** Data Repositories
  - **3** Knowledgebases
  - **13** Programs
  - **1** Project
  - **5** Registries

Data Updates

Existing Participating Resources and Datasets

11 existing resources have been updated with additional data and information or with datasets removed.

- The Biopathology Center
  - Added publications list for dataset SWOG
  - Updated data repository link and added tumor counts for dataset Cooperative Human Tissue Network (CHTN)
- Childhood Cancer Data Initiative (CCDI)
  - **New Dataset** – Childhood Cancer Data Initiative (CCDI): Texas Pediatric Patient Derived Xenograft
  - Updated dataset – Childhood Cancer Data Initiative (CCDI): Molecular Characterization Initiative
  - Updated dataset – National Childhood Cancer Registry Explorer

    - Updated dataset – National Childhood Cancer Registry Database in SEER*Stat
- Human Tumor Atlas Network (HTAN)
    - Updated counts
- Kids First Data Resource
    - Updated dataset – Kids First: T Cell ALL
- NCI Imaging Data Commons (IDC)
    - Updated dataset – CCDI Molecular Characterization Initiative (CCDI-MCI)
- Norwegian Childhood Cancer Biobank (NCCB)
    - Added disease list
- Swedish Childhood Tumor Biobank
    - Updated publications link
- Texas KidsCanSeq
    - Updated resource URL
- Treehouse Childhood Cancer Initiative
    - Updated data repository URLs for all datasets
- Victorian Paediatric Cancer Consortium (VPCC)
    - Updated counts
- VIVO Biobank (VIVO)
    - Added elements
    - Updated counts

General Site Updates

- Resources and Datasets page was updated to allow horizontal scrolling when zoomed in.
- Site Updates page was renamed “Release Notes” to more accurately and consistently describe the information displayed there. Version numbers were also added to the Release Note index and the Release Notes pdf was updated to open in a new tab prior to prompting a download. Color contrast, semantic headings, alt text, and link descriptions were updated for improved 508 compliance.
- Text and padding styles were updated on the Glossary and Search Catalog pages to provide a more consistent user experience.
- Appendix A of the User Guide was updated to reflect resource update dates.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

Steady summer shape up

DATE OF RELEASE: AUGUST 27, 2025

The 30th release of the Childhood Cancer Data Initiative Data Catalog continues a tradition of steady progress, featuring three dataset updates, the restoration of two temporarily removed datasets, one removed dataset, and a new tool resource: the cBioPortal Cancer Data Explorer. Three pages were updated for 508 best practices and text throughout the Catalog was unified with more consistent styling. The User Guide has been updated to reflect all data updates.

Edited 11/19/2025 to correct error in 1.5.4 dataset count

Statistics at a Glance

v1.5.4 Summary

- **30th** Release
- **362** Datasets
- **64** Resources
  - **9** Analytical Tools
  - **6** Biorepositories
  - **8** Catalogs
  - **19** Data Repositories
  - **3** Knowledgebases
  - **13** Programs
  - **1** Project
  - **5** Registries

Data Updates

New Resources

1 new resource has been added.

- CCDI cBioPortal Cancer Data Explorer
  - **New Dataset** – Molecular Characterization Initiative

Existing Participating Resources and Datasets

4 existing resources have been updated with additional data and information or with datasets removed.

- Childhood Cancer Data Initiative (CCDI)
  - Restored dataset – Childhood Cancer Data Initiative (CCDI): Clonal Evolution During Metastatic Spread in High-Risk Neuroblastoma
  - Restored dataset – Childhood Feasibility and Clinical Utility of Whole Genome Profiling in Pediatric and Young Adult Cancers

    - Updated counts for dataset Childhood Cancer Data Initiative (CCDI): Molecular Characterization Initiative
- Kids First Data Resource
    - Updated counts for dataset Kids First: T Cell ALL
- Pediatric Malignancies: Inventory of DCEG Research
    - Removed dataset – Childhood Leukemia and Background Radiation
- Pediatric MATCH
    - Updated counts for dataset Pediatric MATCH (Molecular Analysis for Therapy Choice)
    - Updated contact info and references (published in)

General Site Updates

- Home page color contrast was updated and semantic markup and alt text were added.
- Search Catalog page color contrast was updated, link text was changed from “Export” to “Download,” and semantic markup was added.
- Search Catalog (child) page color contrast was updated, readability was improved to allow horizontal scrolling when zoomed in, and semantic markup was added.
- The User Guide was updated with new content to reflect up-to-date application and resource descriptions.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

July update jam-packed with new datasets

DATE OF RELEASE: JULY 8, 2025

The July 2025 release of the Childhood Cancer Data Initiative Data Catalog features 13 new datasets from three existing resources: cBioPortal, Childhood Cancer Data Initiative, and dbGaP. Counts were updated for eight resources, and additional updates were made to the Patient-Derived Xenograft and Advanced In Vivo Models and the World Health Organization - International Agency for Research on Cancer resources. The User Guide has been updated to reflect all data updates.

Data Updates

Existing Participating Resources and Datasets

10 existing resources have been updated with additional data and information or with datasets removed.

- CancerModels.org
  - Updated counts
- cBioPortal for Cancer Genomics
  - **New Dataset** – Classical Hodgkins Lymphoma
  - **New Dataset** – Ewing Sarcoma MSK
  - **New Dataset** – IDH-mutated Diffuse Glioma MSK
  - **New Dataset** – MSK-CHORD
  - **New Dataset** – Nerve Sheath Tumors
  - **New Dataset** – Pediatric Rhabdomyosarcomas MSK
  - **New Dataset** – Pediatric Tumors MSK
  - **New Dataset** – Rhabdomyosarcomas MSK
  - **New Dataset** – Sarcoma UCLA
- Childhood Cancer Data Initiative (CCDI)
  - **New Dataset** – Childhood Cancer Data Initiative (CCDI): Pediatric In Vivo Testing Program –Sarcoma, Kidney, and Liver Cancers
  - **New Dataset** – Childhood Cancer Data Initiative (CCDI): Pediatric In Vivo Testing Program – Sarcomas and other Solid Tumors
  - Updated counts for dataset Childhood Cancer Data Initiative (CCDI): Molecular Characterization Initiative
- The database of Genotypes and Phenotypes (dbGaP)
  - **New Dataset** – DLK1 Distinguishes Subsets of NF1-Associated Malignant Peripheral Nerve Sheath Tumors with Divergent Molecular Signature
  - **New Dataset** – Germline Genetics of Myelodysplastic Syndromes (MDS) and Acute Myeloid Leukemia (AML)
- Genomic Data Commons (GDC)
  - Updated counts for datasets:
  - Human Cancer Models Initiative (HCMI)

    - The Cancer Genome Atlas (TCGA)
- NCTN Navigator
    - Updated counts
- Patient-Derived Xenograft and Advanced In Vivo Models
    - Updated counts
    - Added reference
- St. Jude Cloud
    - Updated counts for datasets:
    - Clinical Pilot
    - Childhood Solid Tumor Network
    - Real-Time Clinical Genomics
- The Cancer Proteome Atlas (TCPA)
    - Updated counts
- World Health Organization - International Agency for Research on Cancer (WHO – IARC)
    - Updated reference
    - Updated repository links

General Site Updates

- The User Guide was updated with new content to reflect up-to-date application and resource descriptions.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

Five new datasets in May 2025

DATE OF RELEASE: MAY 8, 2025

The May 2025 Childhood Cancer Data Initiative Data Catalog (CCDC) release features updated counts and resource details for many resources and four new datasets: CBTRUS Fact Sheet 2024, Childhood Cancer Data Initiative (CCDI): Pediatric In Vivo Testing Program - Neuroblastoma, GENIE Cohort v17.0-public, and IDC's Pediatric-CT-SEG. A fifth new dataset has been added along with a new resource: the Childhood Cancer Catalog of Extrachromosomal DNA. The footer has been updated for consistent styling and user experience across NCI CCDI applications and help text was added to the About page to provide information for citing the Data Catalog. Detailed updates are below.

Data Updates

New Resources

1 new resource has been added.

- Childhood Cancer Catalog of Circular Extrachromosomal DNA (ecDNA)
  - **New Dataset** – Childhood Cancer Catalog of Circular Extrachromosomal DNA (ecDNA)

Existing Participating Resources and Datasets

16 existing resources have been updated with additional data and information or with datasets removed.

- Central Brain Tumor Registry of the United States (CBTRUS)
  - **New Dataset** – CBTRUS Fact Sheet 2024
- Childhood Cancer Data Initiative (CCDI)
  - **New Dataset** – Childhood Cancer Data Initiative (CCDI): Pediatric In Vivo Testing Program - Neuroblastoma
  - Updated dataset counts for:
  - UCSF Database for the Advancement of JMML - Integration of Metadata with "Omic" Data
  - Childhood Cancer Data Initiative (CCDI): Molecular Characterization Initiative
  - Childhood Cancer Data Initiative (CCDI): Molecular Characterization across Pediatric Brain Tumors and Other Solid and Hematologic Malignancies for Research, Diagnostic, and Precision Medicine
- Clinical Interpretations of Variants in Cancer (CIViC)
  - Updated case disease list
- Fibrolamellar Registry
  - Added counts
- Genomics Evidence Neoplasia Information Exchange (GENIE)
  - **New Dataset** – GENIE Cohort v17.0-public
  - Removed dataset – GENIE Cohort v16.1-public
- NCI Imaging Data Commons (IDC)
  - **New Dataset** – Pediatric-CT-SEG

- Oncogenomics
  - Removed dataset – Melanoma NCT00590844_CCR
- OncoKB
  - Updated case disease list
- PDX Development and Trial Centers Research Network (PDXNet)
  - Updated counts and added data elements for datasets:
  - PDXNet Portal Model
  - PDXNet Portal PDMR Data- Updated resource description
  - Updated resource and contact POCs
  - Updated resource URL
- Pediatric Cancer Data Commons
  - Updated counts for datasets:
  - International Soft Tissue Sarcoma Consortium (INSTRuCT)
  - International Neuroblastoma Risk Group (INRG)
  - Hodgkin Lymphoma Data Collaboration (NODAL)
  - Malignant Germ Cell International Consortium (MaGIC)
  - International Acute Myeloid Leukemia Consortium (INTERACT)
- Single-cell Pediatric Cancer Atlas
  - Updated resource description and references
  - Updated dataset SCPCP000024 to include cell lines
- Therapeutically Applicable Research To Generate Effective Treatments
  - Added available files for OS and MDLS-NBL datasets
  - Updated dataset counts for:
  - Acute Lymphoblastic Leukemia (ALL) Pilot Phase 1
  - Acute Myeloid Leukemia (AML)
  - Neuroblastoma (NBL)
  - Osteosarcoma (OS)
  - Combined ALL Phase 2 and ALL Phase 3 into Acute Lymphoblastic Leukemia (ALL) Expansion Phase 2 and Acute Leukemias of Ambiguous Lineage (ALAL) Phase 3
  - Combined MDLS-NBL and MDLS-PPTP into Cancer Model Systems (MDLS): NBL and Pediatric Preclinical Testing Program (PPTP)
- Texas KidsCanSeq
  - Updated resource URL
- The Cancer Imaging Archive
  - Updated dataset Pediatric-CT-SEG
- Victorian Paediatric Cancer Consortium
  - Updated counts
- Xena Browser
  - Updated case disease list

General Site Updates

- The footer was updated to organize contact link and provide consistent styling across CCDI applications.

- The About page was updated to include description of how to cite the application.
- The User Guide was updated with new content to reflect up-to-date application and resource descriptions.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

Starting the new year with a new resource

DATE OF RELEASE: FEBRUARY 12, 2025

The first Childhood Cancer Data Initiative Data Catalog release of 2025 includes two new datasets: Genomic Profiling of Pediatric B-cell Acute Lymphoblastic Leukemia from dbGaP and the NCTN Biobanks dataset from the newly added resource, NCI National Clinical Trials Network (NCTN) Biobanks. Dataset counts have been updated for datasets from several resources, including Kids First Data Resource, St. Jude Cloud, and The Cancer Imaging Archive. Sample and other counts have been updated for NCTN Navigator, PDX for Childhood Cancer Therapeutics, and The Cancer Proteome Atlas. Additional updates include addition of a banner to the page header to notify users they are accessing an official website of the United States government and substantial updates to figures and content in the user guide to more accurately describe the current state of the application. Detailed updates are below.

Data Updates

New Resources

1 new resource has been added.

- NCI National Clinical Trials Network (NCTN) Biobanks
  - **New Dataset** – NCTN Biobanks

Existing Participating Resources and Datasets

9 existing resources have been updated with additional data and information or with datasets removed.

- Childhood Cancer Data Initiative
  - Temporarily removed – Childhood Cancer Data Initiative (CCDI): Clonal Evolution During Metastatic Spread in High-Risk Neuroblastoma
  - Temporarily removed – Childhood Feasibility and Clinical Utility of Whole Genome Profiling in Pediatric and Young Adult Cancers
- The database of Genotypes and Phenotypes
  - **New Dataset** – Genomic Profiling of Pediatric B-cell Acute Lymphoblastic Leukemia
- Kids First Data Resource
  - Updated dataset counts for Pediatric Brain Tumor Atlas: CBTN
- NCTN Navigator
  - Updated counts
- PDX for Childhood Cancer Therapeutics
  - Updated counts
- St. Jude Cloud
  - Updated dataset counts for:
  - Childhood Solid Tumor Network
  - Pediatric Cancer Genome Project
  - Real-Time Clinical Genomics

- The Cancer Imaging Archive
  - Updated dataset counts for Risk-Based Therapy in Treating Younger Patients With Newly Diagnosed Liver Cancer (AHEP0731)
- The Cancer Proteome Atlas
  - Updated sample counts
- Treehouse Childhood Cancer Initiative
  - Updated resource description

General Site Updates

- Header was updated to include banner with notification of "An official website of the United States government"
- The process for storing and displaying release notes was updated to reduce unnecessary code and improve sustainability.
- The Search Catalog export has been updated to remove Case Gender column as of 2/12/2025.
- The User Guide was updated with new content and images to reflect up-to-date application and resource descriptions.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

Closing the year with new data and features

DATE OF RELEASE: DECEMBER 11, 2024

The December Catalog release includes the addition of two new resources—the Specimen Resource Locator and the Pediatric Malignancies: Inventory of DCEG Research—alongside eight new datasets from existing resources: Cancer Research Institute iAtlas Pancancer Analysis of Whole Genomes (PCAWG) and The Cancer Genome Atlas Program (TCGA); cBioPortal's Pediatric European MAPPYACTS Trial, Gastrointestinal Stromal Tumors, and Mature B-Cell Neoplasms; Imaging Data Commons CCDI Molecular Characterization Initiative (MCI); and Single-cell Pediatric Cancer Atlas (ScPCA) Single-cell RNA sequencing of diverse pediatric leukemias, and Identification of drug-resistance-related cell states in paired pre- and post-treatment neuroblastoma PDXs. Updates were also made to CCDI's NCCR Data Platform description, titles for two ScPCA datasets, and counts for numerous datasets. Two new features were added, the first to enable users to download all dataset digests from the user interface menu, and the second to link to available TARGET datasets in dbGaP. Finally, the Site Updates page was redesigned to improve a better and more consistent experience across CCDI resources. Detailed updates are described below.

Data Updates

New Resources

2 new resources have been added.

- Specimen Resource Locator (SRL)
  - **New Dataset** – Specimen Resource Locator Repositories
- Pediatric Malignancies: Inventory of DCEG Research
  - **New Dataset** – Atypical Spitzoid Tumor Study
  - **New Dataset** – Burkitt Lymphoma (BL) Research in the Infections and Immunoepidemiology Branch
  - **New Dataset** – Childhood Leukemia: Inventory of DCEG Research Studies
  - **New Dataset** – PFAS Exposure and Risk of Cancer
  - **New Dataset** – Study of Childhood Leukemia and Environmental Pesticide and Other Chemical Exposures in California
  - **New Dataset** – Childhood Leukemia and Background Radiation
  - **New Dataset** – Pediatric Proton and Photon Therapy Comparison Cohort
  - **New Dataset** – Ewing Sarcoma Genome-wide Association Study
  - **New Dataset** – DICER1 Natural History Study
  - **New Dataset** – Genetic Studies of Osteosarcoma
  - **New Dataset** – Fanconi Anemia Cancer Screening Study
  - **New Dataset** – Inherited Bone Marrow Failure Syndromes (IBMFS)
  - **New Dataset** – Li-Fraumeni Syndrome Study (LFS)
  - **New Dataset** – RASopathies Study
  - **New Dataset** – Childhood Cancer Survivor Study
  - **New Dataset** – Retinoblastoma Survivors Follow-up Study

Existing Participating Resources

12 existing resources have been updated with additional data and information.

- Cancer Research Institute iAtlas
  - **New Dataset** – Pancancer Analysis of Whole Genomes (PCAWG)
  - **New Dataset** – The Cancer Genome Atlas Program (TCGA)
- CancerModels.Org
  - Updated dataset counts
- cBioPortal for Cancer Genomics
  - **New Dataset** – Pediatric European MAPPYACTS Trial
  - **New Dataset** – Gastrointestinal Stromal Tumors
  - **New Dataset** – Mature B-Cell Neoplasms
  - Updated dataset counts for Sarcoma MSK
- Childhood Cancer Data Initiative (CCDI)
  - Updated NCCR Data Platform dataset description
  - Updated counts for multiple datasets:
  - Molecular Characterization Initiative
  - NCCR Explorer
  - NCCR Database in SEER*Stat>
- Childhood Cancer Survivor Study (CCSS)
  - Updated counts
- Genomics Evidence Neoplasia Information Exchange (GENIE)
  - Dataset GENIE Cohort v15.1-public was replaced by dataset GENIE Cohort v16.1-public
- Genomic Data Commons (GDC)
  - Updated counts for multiple datasets:
  - Clinical Proteomic Tumor Analysis Consortium (CPTAC)
  - Molecular Analysis for Therapy Choice Program (MATCH)
  - Therapeutically Applicable Research to Generate Effective Treatments (TARGET)
- Imaging Data Commons (IDC)
  - **New Dataset** – CCDI Molecular Characterization Initiative (MCI)
- Kids First Data Resource
  - Updated counts for multiple datasets:
  - Kids First: Ewing Sarcoma - Genetic Risk
  - Kids First: Osteosarcoma
- Single-cell Pediatric Cancer Atlas (ScPCA)
  - **New Dataset** – Single-cell RNA sequencing of diverse pediatric leukemias
  - **New Dataset** – Identification of drug-resistance-related cell states in paired pre- and post-treatment neuroblastoma PDXs
  - Updated dataset titles:
  - Single-cell profiling of Acute Myeloid Leukemia for high-resolution chemo-immunotherapy target discovery
  - Single-cell sequencing of acute lymphoblastic leukemia
- St. Jude Cloud

    - Updated dataset counts for Public Resource of Patient-derived and Expanded Leukemias (PROPEL)
- Therapeutically Applicable Research to Generate Effective Treatments (TARGET)
    - Added links to dbGaP files for multiple datasets:
    - Kidney, Clear Cell Sarcoma of the Kidney (CCSK)
    - Kidney, Rhabdoid Tumor (RT)
    - Kidney, Wilms Tumor (WT)
    - Neuroblastoma (NBL)

General Site Updates

- "Available Files" links were added to the Additional Data Elements on the individual dataset view for the following datasets:
    - phs000466 (new dataset) TARGET: Clear Cell Sarcoma of the Kidney (CCSK)
    - phs000467 TARGET: Neuroblastoma (NBL)
    - phs000470 TARGET: Kidney, Rhabdoid Tumor (RT)
    - phs000471 TARGET: Kidney, Wilms Tumor (WT)
- A "Metadata Files" link was added to the navigation bar under the CCDI Studies menu to enable users to download all digests directly from the UI.
- An index was added to the Site Updates page to improve navigation between release notes and provide a more consistent experience across CCDI resources.
- 1.5.0 release notes were updated to reflect the correct an error in the summary count of datasets added in the last release.
- The User Guide is updated to reflect new and updated resource information.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

A New Season of Data

DATE OF RELEASE: SEPTEMBER 25, 2024

September's release includes updates to several existing resources and the addition of five new datasets: CCDI's National Childhood Cancer Registry Data Platform and dbGaP's Exploring the Microbiome-Gut-Brain Axis with Respect to Psychoneurological Symptoms for Children with Solid Tumors, Correlative Studies for Protocol #14-C-0059: T Cells Expressing an Anti-GD2 Chimeric Antigen Receptor in Patients with GD2+ Solid Tumors, a Collaboration with CIMAC-CIDC, Aberrant Activation of Wound Healing Programs within the Metastatic Niche Facilitates Lung Colonization by Osteosarcoma Cells, and Early Detection of Malignant and Pre-Malignant Peripheral Nerve Tumors Using Cell-Free DNA Fragmentomics. Counts were updated for the Human Cancer Models Initiative (HCMI) and Pediatric Cancer Data Commons (PCDC) resources, and clinical trial lists were added to multiple datasets for the Biopathology Center (BPC). Additional changes were made to repository links, resource URLs, and reference links. No new features were added in this release.

Detailed updates are described below.

Data Updates

Existing Participating Resources and Datasets

8 existing resources have been updated with additional data and information.

- The Biopathology Center (BPC)
  - Updated multiple datasets with clinical trial list:
  - Gynecologic Oncology Group Foundation (GOG)
  - SWOG
  - Sarcoma Alliance for Research through Collaboration
- Swedish Childhood Tumor Biobank (BTB)
  - Added data repository link
- Childhood Cancer Data Initiative (CCDI)
  - **New Dataset** – National Childhood Cancer Registry Data Platform
- The database of Genotypes and Phenotypes (dbGaP)
  - **New Dataset** – Exploring the Microbiome-Gut-Brain Axis with Respect to Psychoneurological Symptoms for Children with Solid Tumors
  - **New Dataset** – Correlative Studies for Protocol #14-C-0059: T Cells Expressing an Anti-GD2 Chimeric Antigen Receptor in Patients with GD2+ Solid Tumors, a Collaboration with CIMAC-CIDC
  - **New Dataset** – Aberrant Activation of Wound Healing Programs within the Metastatic Niche Facilitates Lung Colonization by Osteosarcoma Cells
  - **New Dataset** – Early Detection of Malignant and Pre-Malignant Peripheral Nerve Tumors Using Cell-Free DNA Fragmentomics
- Human Cancer Models Initiative (HCMI)
  - Updated counts
- Pediatric Cancer Data Commons (PCDC)

    - Updated counts for multiple datasets:
    - International Neuroblastoma Risk Group (INRG)
    - International Soft Tissue Sarcoma Consortium (INSTRuCT)
    - Hodgkin Lymphoma Data Collaboration (NODAL)
- Texas KidsCanSeq
    - Updated resource URL
    - Added data repository link
- VIVO Biobank (VIVO)
    - Updated data repository link
    - Added reference link

General Site Updates

- 1.4.9 release notes were updated to correct an error in the summary count of datasets added in the last release.
- The User Guide is updated to reflect new and updated resource information.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

Dog Days of Summer Data Updates

DATE OF RELEASE: AUGUST 21, 2024

The August release includes numerous updates to existing resources and six new datasets: CCDI's Single-Cell Atlas of NF1 Nerve Sheath Tumors and Identification and Targeting of Treatment Resistant Progenitor Populations in T-cell Acute Lymphoblastic Leukemia; TCIA's MR Imaging of Pediatric Subjects with High-Grade Gliomas (DFCI-BCH-BWH-PEDs-HGG); and ScPCA's Single-cell Atlas of Pediatric Sarcoma, Single-cell profiling of pediatric bone sarcoma, and Profiling the transcriptional heterogeneity of diverse pediatric solid tumors - Osteosarcoma. Additional changes include updated counts of seven resources, updated case disease diagnosis lists for two resources, and updated references, resource-level properties, and other minor changes for numerous resources. Links were removed for the NCI CCSG CCDI Supplement Additional Genomic Submission and the ICGC Data Portal, and datasets were removed from Kids First Data Resource (ICR-DIPG, TARGET-AML, TARGET-NB, and PBTA-PNOC) and the Cancer Genome Characterization Initiative (NHL). No new functional updates were made to the user interface, but a critical software update was made to mitigate a potential security vulnerability.

Detailed updates are described below. [*Edited 9/25/2024 to correct errors in resource and dataset count summaries*]

Data Updates

Existing Participating Resources and Datasets

15 existing resources have been updated with additional data and information or removed.

- Childhood Cancer Data Initiative (CCDI)
  - New Dataset – Childhood Cancer Data Initiative (CCDI): Single-Cell Atlas of NF1 Nerve Sheath Tumors
  - New Dataset – Childhood Cancer Data Initiative (CCDI): Identification and Targeting of Treatment Resistant Progenitor Populations in T-cell Acute Lymphoblastic Leukemia
  - Removed data repository link for NCI CCSG CCDI Supplement Additional Genomic Submission
  - Updated multiple datasets:
  - NCI CCSG CCDI Supplement Additional Genomic Submission
  - UCSF Database for the Advancement of JMML - Integration of Metadata with "Omic" Data
  - Feasibility and Clinical Utility of Whole Genome Profiling in Pediatric and Young Adult Cancers
  - Childhood Cancer Data Initiative (CCDI): OncoKids - NGS Panel for Pediatric Malignancies
  - Childhood Cancer Data Initiative (CCDI): Molecular Characterization Initiative
  - Childhood Cancer Data Initiative (CCDI): Clonal Evolution During Metastatic Spread in High-Risk Neuroblastoma
  - Childhood Cancer Data Initiative (CCDI): Comprehensive Genomic Sequencing of Pediatric Cancer Cases (CMRI/KUCC)
  - Childhood Cancer Data Initiative (CCDI): Molecular Characterization across Pediatric Brain Tumors and Other Solid and Hematologic Malignancies for Research, Diagnostic, and Precision Medicine

    - Childhood Cancer Data Initiative (CCDI): Genomic Analysis in Pediatric Malignancies
    - Childhood Cancer Data Initiative (CCDI): Integrating Longitudinal Clinical, Sociodemographic and Genomic Data into the NCCR
    - Childhood Cancer Data Initiative (CCDI): Single-Cell Atlas of NF1 Nerve Sheath Tumors
    - Childhood Cancer Data Initiative (CCDI): Identification and Targeting of Treatment Resistant Progenitor Populations in T-cell Acute Lymphoblastic Leukemia
- Childhood Cancer Repository (CCR)
    - Updated case disease diagnosis list
- Innovative Therapies for Children with Cancer Paediatric Preclinical Proof-of-Concept Platform (ITCCP4)
    - Added case disease diagnosis list and data repository link
- Genomic Data Commons (GDC)
    - Updated counts for the Molecular Analysis for Therapy Choice (MATCH) Program dataset
    - Updated counts for the Clinical Proteomic Tumor Analysis Consortium (CPTAC) dataset
- Kids First Data Resource (KFDR)
    - Removed datasets no longer belonging to Kids First Data, including ICR-DIPG, TARGET-AML, TARGET-NB, and PBTA-PNOC
    - Updated data repository links for Kids First Osteosarcoma (OS), T Cell ALL (TALL), and Intracranial Germ Cell Tumors (IGCT) datasets
    - Updated counts for Pediatric Brain Tumor Atlas: CBTN (CBTN) and Kids First: Ewing Sarcoma - Genetic Risk (ESGR)
- The Cancer Imaging Archive (TCIA)
    - New dataset – MR Imaging of Pediatric Subjects with High-Grade Gliomas (DFCI-BCH-BWH-PEDs-HGG)
- NCTN Navigator (NCTN)
    - Updated counts and added two clinical trials
- Cancer Epidemiology Descriptive Cohort Database (CEDCD)
    - Updated counts
- International Cancer Genome Consortium Data Portal (ICGC)
    - Removed resource and updated glossary accordingly due to closure of portal in June 2024
- Cancer Genome Characterization Initiative (CGCI)
    - Updated counts for the Burkitt Lymphoma Genome Sequencing Project (BLGSP) and HIV+ Tumor Molecular Characterization Project (HTMCP) datasets
    - Removed NHL dataset as it is no longer part of CGCI
    - Updated several resource-level properties
- Pediatric MATCH (PedMATCH)
    - Updated reference (published in)
- The database of Genotypes and Phenotypes (dbGaP)
    - Updated counts for The Institute for Genomic Medicine at Nationwide Children''s Hospital Pediatric Cancer and Blood Disorder Project dataset
- Human Tumor Atlas Network (HTAN)
    - Updated digest information
- Pediatric Preclinical Testing Consortium (PPTC)
    - Updated counts

- Single-cell Pediatric Cancer Atlas (ScPCA)
  - New dataset – Single-cell Atlas of Pediatric Sarcoma
  - New dataset – Single-cell profiling of pediatric bone sarcoma
  - New dataset – Profiling the transcriptional heterogeneity of diverse pediatric solid tumors – Osteosarcoma
  - Minor updates to existing datasets

General Site Updates

- Node.js was updated to mitigate a potential security vulnerability.
- The Glossary has been updated.
- The User Guide is updated to reflect new and updated resource information.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

Steady Progress

DATE OF RELEASE: JUNE 12, 2024

This release of the Childhood Cancer Data Catalog includes 4 new datasets in 3 resources, updated counts from the CancerModels.org and Patient-Derived Xenograft and Advanced In Vivo Models (PDX-AIM) datasets, and a reorganization of the Childhood Cancer and Leukemia International Consortium (CLIC) dataset as a part of the World Health Organization - International Agency for Research on Cancer (WHO-IARC).

Additional functional improvements include the clean-up of an issue resulting in blocks of unreadable text in the site updates export PDFs, and updating the DNS certificate for the Catalog.

Detailed data and site updates are described below.

Data Updates

Existing Participating Resources and Datasets

6 existing resources have been updated with additional data and information.

- CancerModels.org
  - Added total case count and updated counts
- cBioPortal for Cancer Genomics
  - **New Dataset** – Low-Grade Gliomas UCSF
  - **New Dataset** – Rhabdomyosarcoma NIH
- Childhood Cancer Data Initiative (CCDI)
  - **New Dataset** – Childhood Cancer Data Initiative (CCDI): CCDI Pediatric In Vivo Testing Program – Leukemia
  - Updated point of contact names
- Gene Expression Omnibus (GEO)
  - **New Dataset** – Genes regulated in EML1 cells expressing the TEL-AML1 oncogene after 5 and 7 days of treatment with IL7 and FLT3 ligand
- Patient-Derived Xenograft and Advanced In Vivo Models (PDX AIM)
  - Updated counts
- World Health Organization - International Agency for Research on Cancer (WHO-IARC)
  - Added Childhood Cancer and Leukemia International Consortium (CLIC) as a dataset within WHO-IARC and removed it as an independent resource

General Site Updates

- Readability of the site updates export PDFs was improved.
- The DNS certificate was updated.
- The Glossary has been updated.
- The User Guide is updated to reflect new and updated resource information.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

Make it count in May

DATE OF RELEASE: MAY 17, 2024

May Catalog updates include 13 new datasets, in addition to a disease list from Xena Browser and updated counts from the St. Jude Cloud Real-Time Clinical Genomics and PDX Development and Trial Centers PDXNet Portal PDMR datasets. This update also includes the addition of The South African National Cancer Registry (NCR) and the World Health Organization - International Agency for Research on Cancer (WHO-IARC). NCR has demographic, clinical, and reporting source cancer registration data and has played a critical role in the development of cancer prevention and control policy for the country. The objective of IARC is to promote international collaboration in cancer research so that preventive measures may be adopted, and the burden of disease and associated suffering reduced.

A function to pause the Resource Carousel has been added, allowing users to interact with and digest the displayed content at their preferred pace.

Detailed data and site updates are described below.

Data Updates

New Participating Resource and Datasets

- South African National Cancer Registry (NCR)
- World Health Organization - International Agency for Research on Cancer (WHO-IARC)

Existing Participating Resources and Datasets

7 existing resources have been updated with additional data and information.

- cBioPortal for Cancer Genomics
  - **New Dataset** – Myelodysplastic Syndromes IWG
  - **New Dataset** – Pan-cancer Analysis of Advanced and Metastatic Tumors
  - **New Dataset** – Neuroblastoma U Cologne
  - **New Dataset** – Metastatic Solid Cancers U Michigan
  - **New Dataset** – Medulloblastoma Sickkids
  - **New Dataset** – Combined Hepatocellular and Intrahepatic Cholangiocarcinoma Peking University
  - **New Dataset** – Skin Cutaneous Melanoma Broad
- Childhood Cancer Data Initiative (CCDI)
  - **New Dataset** – Integrating Longitudinal Clinical, Sociodemographic and Genomic Data into the NCCR
  - **New Dataset** – Enhancement of Data Sharing in Pediatric, Adolescent and Young Adult Cancers
- GENIE
  - **New Dataset** – GENIE Cohort v15.1-public
- PDX Dev and Trial Centers

    - Updated PDXNet Portal PDMR Data counts
- ScPCA
    - **New Dataset** – Identification of drug-resistance-related cell states in paired pre- and post-treatment neuroblastoma cell lines
    - **New Dataset** – Profiling pediatric and young adolescent (Ped-AYA) high-grade gliomas (HGGs)
- St. Jude Cloud
    - **New Dataset** – Landscape of Pediatric Acute Myeloid Leukemia
    - Updated counts for Real-Time Clinical Genomics
- Xena Browser
    - Added disease list

General Site Updates

- A new pause function has been added to the Resource Carousel.
- The Glossary has been updated with new acronyms and abbreviations.
- The User Guide is updated to reflect new and updated resource information.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

Planting Seeds of Discovery

DATE OF RELEASE: APRIL 10, 2024

The April update of the Catalog includes the addition of 16 new datasets and the Genomics Evidence Neoplasia Information Exchange (GENIE) resource. The GENIE resource is a publicly accessible cancer registry of real-world clinico-genomic data assembled through data sharing between 19 leading international cancer centers coordinated through the American Association for Cancer Research (AACR).

The Catalog now features a new Contribute to the CCDCpage dedicated to providing information about submitting data and joining the CCDC's collection of community resources.

Explore the data and site updates in more detail below.

Data Updates

New Participating Resource and Datasets

- Genomics Evidence Neoplasia Information Exchange (GENIE)
- **New Dataset** – AACR Project GENIE AKT1 Cohort
- **New Dataset** – BioPharma Collaborative Colorectal Cancer v2.0 Public
- **New Dataset** – BioPharma Collaborative Non-Small Cell Lung Cancer (NSCLC) v2.0 Public
- **New Dataset** – DFCI-Profile Glioma Cohort 2013-2018
- **New Dataset** – ERBB2 Cohort
- **New Dataset** – Metastatic Breast Cancer: 2013-2016

Existing Participating Resources and Datasets

5 existing resources have been updated with additional data and information.

- cBioPortal for Cancer Genomics
  - **New Dataset** – Acute Myeloid Leukemia OHSU
  - **New Dataset** – Breast Cancer METABRIC
  - **New Dataset** – Breast Cancer SMC
  - **New Dataset** – Diffuse Glioma (GLASS Consortium)
  - **New Dataset** – Diffuse Large B-Cell Lymphoma Duke
  - **New Dataset** – Medulloblastoma DKFZ
  - **New Dataset** – Neuroblastoma AMC Amsterdam
  - **New Dataset** – Pediatric Brain Cancer CPTAC/CHOP
- Childhood Cancer Data Initiative (CCDI)
  - Updated case and sample counts for the Molecular Characterization Initiative (MCI) dataset
- Central Brain Tumor Registry of the United States (CBTRUS)
  - **New Dataset** – CBTRUS Fact Sheet 2023
- OncoKB
  - Updated case disease diagnosis.

- Pediatric Cancer Data Commons (PCDC)
  - **New Dataset** – International Acute Myeloid Leukemia Consortium (INTERACT)
  - Updated case and sample counts for the *Hodgkin Lymphoma Data Collaboration (NODAL)*, *International Neuroblastoma Risk Group (INRG)*, and *International Soft Tissue Sarcoma Consortium (INSTRuCT)* datasets.

General Site Updates

- A new Contribute to the CCDCpage, available under the About menu, was added to share information on how to contribute data to the CCDC.
  - If a resource or study involves participants younger than 40 and focuses on cancer or supports cancer research, resource or study is eligible to contribute.
  - A submission templates can be completed and sent to NCIChildhoodCancerDataInitiative@mail.nih.gov.
- The ‘CCDI Studies’ menu was updated to include direct links to the following CCDI Applications:
  - The Childhood Cancer Data Initiative Hub (CCDI Hub)is an entry point to the Data Ecosystem and provides direct links to applications, tools, resources, and additional technical information, including the CCDC.
  - The CCDI"s Molecular Targets Platform (MTP)includes a computable interpretation of the FDA"s Relevant Molecular Target List at an individual gene level. The MTP is open access and currently includes nearly 59,000 potential genes and 215 relevant molecular targets in more than 60 specific pediatric cancers.
  - The Childhood Cancer Clinical Data Commons (C3DC)is an open-access web application that serves as the primary source for deidentified, individual-level harmonized data that describes the demographic and phenotypic characteristics of participants.
- The Glossary has been updated with new acronyms and abbreviations.
- The User Guide is updated to reflect new and updated resource information.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

Data at the End of the Rainbow

DATE OF RELEASE: MARCH 13, 2024

This release of the Catalog includes updates for 5 existing resources with 11 new datasets and other data updates. Among the new dataset are 2 additions to the Childhood Cancer Data Initiative resource: one new project dataset, Genomic Analysis in Pediatric Malignancies, and one new analytic tool set, Center for Computational and Genomic Medicine Analytic Tools.

Explore the data and site updates in more detail below.

Data Updates

Existing Participating Resources and Datasets

5 existing resources have been updated with additional data and information.

- cBioPortal for Cancer Genomics
  - **New Dataset** – ALL St. Jude 2015
  - **New Dataset** – ALL St. Jude 2016
  - **New Dataset** – Pediatric Ewing Sarcoma Dana-Farber Cancer Institute
  - **New Dataset** – Ewing Sarcoma Institute Curie
  - **New Dataset** – Medulloblastoma Pediatric Cancer Genome Project
  - **New Dataset** – Pediatric Neuroblastoma MSK
- Childhood Cancer Data Initiative (CCDI)
  - **New Dataset** – Childhood Cancer Data Initiative (CCDI): Genomic Analysis in Pediatric Malignancies
  - **New Dataset** – Center for Computational and Genomic Medicine Analytic Tools
- Fibrolamellar Registry
  - Added dbGaP Study Identifier
- Texas Pediatric Cancer Drug Testing Core & Pediatric Preclinical In Vivo Testing Consortium
  - Updated resource description.
- The database of Genotypes and Phenotypes (dbGaP)
  - **New Dataset** – Circulating Genomic Determinants of Treatment Failure in Hodgkin Lymphoma
  - **New Dataset** – Profiling RNA Translation in Pediatric Medulloblastoma
  - **New Dataset** – Retinoblastoma Aqueous Humor Liquid Biopsy Repository

General Site Updates

- The ‘Featured Item’ carousel now includes a pause button. Selecting the button will pause the automatic advancement of the carousel and selecting it a second time will restart the advancement.
- The Glossary has been updated with new acronyms and abbreviations.
- The User Guide is updated to reflect new and updated resource information.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

Data Is Sweet, and So Are You

DATE OF RELEASE: FEBRUARY 14, 2024

This update includes the addition of the National Clinical Trials Network (NCTN) Navigator and theCancer Epidemiology Descriptive Cohort Database (CEDCD). The NCTN Navigator allows Investigators to query from available biospecimens, and to request biospecimens to validate exploratory correlative analysis hypotheses. The CEDCD is a searchable database that contains general study information (e.g., eligibility criteria and size), the type of data collected at baseline, cancer sites, number of participants diagnosed with cancer, and biospecimen information to facilitate collaboration and highlight the opportunities for research within existing cohort studies.

The Catalog also updated 9 existing resources, including 8 new datasets, along with numerous data updates.

Explore the data and site updates in more detail below.

Data Updates

New Participating Resource and Dataset

The CCDC has added **2** new resources.

- National Clinical Trials Network (NCTN) Navigator
- Cancer Epidemiology Descriptive Cohort Database (CEDCD)

Existing Participating Resources and Datasets

9 existing resources have been updated with additional data and information.

- cBioPortal for Cancer Genomics
  - **New Dataset** – China Pan-cancer
  - **New Dataset** – Pediatric Pan-Cancer DKFZ
  - **New Dataset** – Pediatric Preclinical Testing Consortium
  - **New Dataset** – Pediatric Pan-cancer Columbia University
- Childhood Cancer Data Initiative (CCDI)
  - 'National Childhood Cancer Registry Database in SEER*Stat' dataset was moved to the CCDI resource.
- Genomic Data Commons (GDC)
  - Updated the case, case disease diagnosis, and sample counts for Molecular Analysis for Therapy Choice Program dataset.
- Kids First Data Resource
  - Updated the case, case disease diagnosis, and sample counts for Kids First: Myeloid Malignancies dataset.
- MicroRNA Childhood Cancer Catalog (M3C)
  - Updated case and case disease diagnosis counts.
- Removed: National Childhood Cancer Registry (NCCR) Database in SEER*Stat

    - ‘National Childhood Cancer Registry Database in SEER*Stat’ dataset was moved to the CCDI resource.
- Pediatric Cancer Data Commons (PCDC)
    - **New Dataset** – Malignant Germ Cell International Consortium (MaGIC)
- Texas Pediatric Cancer Drug Testing Core & Pediatric Preclinical In Vivo Testing Consortium
    - Updated resource name to *Texas Pediatric Cancer Drug Testing Core & Pediatric Preclinical In Vivo Testing Consortium* from *Greehey Children’s Cancer Research Institute*.
    - Updated resource URL, description, and Resource Type.
- The Cancer Imaging Archive
    - **New Dataset** – Annotations for Risk-Based Therapy in Treating Younger Patients With Newly Diagnosed Liver Cancer (AHEP0731-Tumor-Annotations)
    - **New Dataset** – Annotations for Radiation Therapy, Amifostine, and Chemotherapy in Treating Young Patients With Newly Diagnosed Nasopharyngeal Cancer Collection (ARAR0331-Tumor-Annotations)
    - **New Dataset** – Data Analysis Centers

General Site Updates

- A major update to the ‘Accessing CCDI Data’ guide expanding the information on how to find, request, access, download, and analyze controlled-access data from CCDI.
    - Expanded information on access control NIH eRA Commonsand dbGaP.
    - A new section on using the CCDI Hub’s Explore Dashboardto find participants, samples, and files and how to generate a manifest from those queries to use within the Cancer Genomics Cloud (CGC).
    - New information on using the NCI’s Data Commons Framework Services (DCFS)for controlled data access to CCDI data.
- The Glossary has been updated with new acronyms and abbreviations.
- The User Guide is updated to reflect new and updated resource information.

Dataset Details

- The Core Data Element dynamic charts on the Dataset Details page have been updated to display large numbers with a comma separator (e.g., 1,185).

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

The Quest for Data and Discovery

DATE OF RELEASE: JANUARY 17, 2024

This update includes the addition of the cBioPortal for Cancer Genomics repository and the Innovative Therapies for Children with Cancer Paediatric Preclinical Proof-of-Concept Platform (ITCC-P4) program. The cBioPortal for Cancer Genomics is a tool for interactive exploration of genomics data sets that aims to lower the barriers between complex genomic data and cancer researchers. The ITCC-P4 is a multi-country consortium that aims to establish new patient-derived preclinical models of high-risk pediatric tumors which can be fully characterized.

The Catalog also updated 8 existing resources, including 1 new dataset, along with numerous data updates.

Explore the data and site updates in more detail below.

Data Updates

New Participating Resource and Dataset

The CCDC has added **2** new resources.

- cBioPortal for Cancer Genomics
  - **New Dataset** - Sarcoma MSK 2022
- Innovative Therapies for Children with Cancer Paediatric Preclinical Proof-of-Concept Platform (ITCC-P4)

Existing Participating Resources and Datasets

8 existing resources have been updated with additional data and information.

- Children's Oncology Group (COG)
  - Updated Clinical Trial List URL
- Genomic Data Commons
  - Remove GENIE dataset.
  - Remove Project Name data element from BEAT AML dataset
- Greehey Children's Cancer Research Institute
  - Updated resource name to *Greehey Children's Cancer Research Institute* from *Greehey Children's Cancer Research Institute Xenograft & Cell-Lines Core.*
  - Updated resource Point of Contact (POC) and URL.
  - Updated dataset name to *Texas Pediatric Cancer Drug Testing Core and Pediatric Preclinical In Vivo Testing Consortium* from *Pediatric Preclinical Testing Program.*
  - Updated dataset POC information, dataset Descriptions, and Published In URLs.
  - Added Data Repositories URLs to dataset.
- Kids First Data Resource
  - Updated Description for TARGET: Acute Myeloid Leukemia dataset
- National Childhood Cancer Registry Database in SEER*Stat

    - Updated resources name to *National Childhood Cancer Registry Database in SEER*Stat* from *Surveillance, Epidemiology, and End Results Program*
    - Updated resource Description and URL.
    - Updated dataset name to *NCCR Database in SEER*Stat* from *National Childhood Cancer Registry Explorer*
    - Updated dataset description and Data Repository link. Removed Published In URL.
- PDX for Childhood Cancer Therapeutics (PCAT)
    - Updated Case Tumor Site and Sample Anatomic Site values and counts
- Pediatric Preclinical Testing Consortium (PPTC)
    - Updated resource and data repository URLs
- St. Jude Cloud
    - **New Dataset** - Public Resource of Patient-derived and Expanded Leukemias (PROPEL)

General Site Updates

- The Glossary has been updated with new acronyms and abbreviations.
- The User Guide is updated to reflect new and updated resource information.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

Cold Hands, Warm Data

DATE OF RELEASE: DECEMBER 13, 2023

This update includes the addition of the Osteosarcoma Explorer (OSE) analytical tool. The OSE is a web portal that incorporates a rich array of clinical, genomic, proteomic, and pathological imaging data for use with patient query, online analysis, and digital pathology visualization tools.

The Catalog also updated 6 existing resources, including 1 new dataset, along with numerous data updates.

Explore the data and site updates in more detail below.

Data Updates

New Participating Resource and Dataset

The CCDC has added **1** new Analytic Tool resource.

- Osteosarcoma Explorer (OSE)

Existing Participating Resources and Datasets

6 existing resources have been updated with additional data and information.

- CancerModels.Org
  - Added case tumor site data element
  - Updated case and case disease diagnosis counts
- Childhood Cancer Data Initiative (CCDI)
  - Updated case and sample counts for the Molecular Characterization Initiative (MCI) dataset
- The database of Genotypes and Phenotypes (dbGaP)
  - **New dataset** - My Pediatric and Adult Rare Tumor (MyPART) Natural History Study of Rare Solid Tumors
- Genomic Data Commons (GDC)
  - Added a link to the Cancer Digital Slide Archive to The Cancer Genome Atlas (TCGA) dataset
- Human Tumor Atlas Network (HTAN)
  - Updated case and sample counts
- Patient-Derived Xenograft and Advanced In Vivo Models (PDX-AIM)
  - Updated case and case disease diagnosis counts

General Site Updates

- The User Guide is updated to reflect new and updated resource information.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a

name and a reference to the CCDC with the submitted inquiry.

A Gathering of Data

DATE OF RELEASE: NOVEMBER 15, 2023

This update includes additional count information for the Childhood Cancer Data Initiative and the Victorian Paediatric Cancer Consortium resources as well as an update to the NCI Imaging Data Commons.

Explore the data and site updates in more detail below.

Data Updates

Existing Participating Resources and Datasets

3 existing resources have been updated with additional data and information.

- Childhood Cancer Data Initiative (CCDI)
  - Updated sample counts for Molecular Characterization Initiative (MCI)
- NCI Imaging Data Commons (IDC)
  - Added a Data Repository link to RMS-Mutation-Prediction
  - Updated resource name to *NCI Imaging Data Commons* from *Imaging Data Commons*
- Victorian Paediatric Cancer Consortium
  - Updated case counts, case disease diagnosis information, and sample counts for Childhood Cancer Model Atlas

General Site Updates

- The User Guide is updated to reflect new and updated resource information.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

A Treat of Data

DATE OF RELEASE: OCTOBER 19, 2023

This update includes the addition of Imaging Data Commons (IDC). The IDC is a cloud-based repository of publicly available cancer imaging data co-located with the analysis and exploration tools and resources. This new resource adds the Rhabdomyosarcoma (RMS) Mutation Prediction dataset which contains manifest information on hematoxylin and eosin (H&E) stained images available in IDC.

The Catalog also updated existing resources to add 4 datasets along with numerous data updates.

Explore the data and site updates in more detail below.

Data Updates

New Participating Resource and Dataset

The CCDC has added **1** new Data Repository resource.

- Imaging Data Commons (IDC)

Existing Participating Resources and Datasets

7 existing resources have been updated with additional data and information.

- Childhood Cancer Data Initiative (CCDI)
  - Updated sample counts for Molecular Characterization Initiative (MCI)
  - Added case counts for National Childhood Cancer Registry Explorer
- Genomic Data Commons (GDC)
  - **New dataset** - Molecular Analysis for Therapy Choice Program (MATCH)
  - Updated case counts, case disease diagnosis information, and sample counts for Cancer Genome Characterization Initiative (CGCI), Clinical Proteomic Tumor Analysis Consortium (CPTAC), The Cancer Genome Atlas (TCGA), and Human Cancer Models Initiative (HCMI)
- Kids First Data Resource
  - **New dataset** – Kids First: Intracranial Germ Cell
  - Updated case counts, case disease diagnosis information, and sample counts for Kids First: Leukemia & Heart Defects in Down Syndrome
- Pediatric Cancer Data Commons (PCDC)
  - **New dataset** – Hodgkin Lymphoma Data Collaboration (NODAL)
  - Updated case counts and case disease diagnosis information for International Neuroblastoma Risk Group (INRG)
- Population-based Research to Optimize the Screening Process (PROSPR)
  - **New dataset** - PROSPR 2 - METRICS Cervical Cancer Restricted Use Dataset
  - Removed PROSPR 1 Breast Cancer Public Use Dataset, PROSPR 1 Cervical Cancer Public Use Dataset, and PROSPR 2 Cervical Cancer Public Use Dataset
- St. Jude Cloud

    - Updated case counts, case disease diagnosis information, and sample counts for Real-Time Clinical Genomics
- Surveillance, Epidemiology, and End Results Program (SEER)
    - Updated case counts

General Site Updates

- The Glossary has been updated with new acronyms and abbreviations.
- The User Guide is updated to reflect new and updated resource information.

Search Catalog

- The Search Catalog export file has been expanded and updated to make information more accessible.
    - The identifiers for dbGaP, GEO, Clinical Trial.gov, and SRA are now listed as unique columns.
    - The export now includes a unique column for the Data Repository URL, as well as columns for dbGaP, GEO, Clinical Trial.gov, and SRA URLs.
    - Grant Name and Grant ID are now listed in unique columns.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

Learning from Data

DATE OF RELEASE: SEPTEMBER 20, 2023

This update includes the addition of 2 new datasets to the database of Genotypes and Phenotypes (dbGaP) resource and the addition of the TCIABrowser, a tool to connect to the TCIA to browse different collections, patient subjects, studies, and series as well as download the images and visualize them in 3D slicer. Additionally, 5 other resources have been updated with new dataset information.

Explore the data and site updates in more detail below.

Data Updates

Existing Participating Resources and Datasets

7 existing resources have been updated with additional data and information.

- Childhood Cancer Data Initiative (CCDI)
  - Updated case counts, case disease diagnosis information, and sample counts for Molecular Characterization Initiative (MCI).
- The database of Genotypes and Phenotypes (dbGaP)
  - **New dataset** – ARST17B2-Q Germline and Somatic Genetic Landscape of Pediatric Rhabdomyosarcoma
  - **New dataset** – Comprehensive Omics Analysis of Pediatric Solid Tumors and Establishment of a Repository for Related Biologic Studies (10C0086)
- Genomic Data Commons (GDC)
  - Updated case counts, case disease diagnosis information, and sample counts for *MP2PRT: Identification of Genetic Changes Associated with Relapse and/or Adaptive Resistance in Patients Registered as Favorable Histology Wilms Tumor on AREN03B2*
- Human Cancer Models Initiative (HCMI)
  - Added dbGaP accession.
- My Pediatric and Adult Rare Tumor (MyPART) network
  - Added additional Clinical Trial Identifiers
- The Cancer Imaging Archive (TCIA)
  - **New analytic tool –** TCIABrowser
- Population-based Research to Optimize the Screening Process (PROSPR)
  - Updated *METRICS Cervical Cancer Public Use Dataset* with new counts and a new ‘Worst Cytology in 12 Months Prior to Cancer Diagnosis’ data element.

General Site Updates

- Additional metadata has been added to the site to improve searchability and make the site easier to find.
- The ‘Biorepository’ resource tool tip now appears on hover.
- The Documentation Search feature expanded to search terms on the Site Updates page.
- The User Guide is updated to reflect new and updated resource information.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

Expanding for Biorepositories

DATE OF RELEASE: AUGUST 16, 2023

This update includes the addition of Biorepository as a new Resource Type. This new resource type expands the available resources to include resources that act as libraries for biospecimens, allowing for the biospecimens to be available for use in future research. This initial update includes both national and international biorepositories.

The Catalog is also expanded to add 4 new resources and 10 new datasets.

Explore the data and site updates in more detail below.

Data Updates

New Participating Resource and Dataset

The CCDC has added **4** new resources with connections to 9 biorepositories. These resources are all part of the new Resource Type 'Biorepository.'

- Norwegian Childhood Cancer Biobank (NCCB)
- Swedish Childhood Tumor Biobank (BTB)
- The Biopathology Center (BPC)
  - Children's Oncology Group Biorepository
  - Cooperative Human Tissue Network
  - NRG Oncology Biospecimen Bank
  - Gynecologic Oncology Group Foundation
  - SWOG
  - Sarcoma Alliance for Research through Collaboration
- VIVO Biobank

Existing Participating Resources and Datasets

4 existing resources have been updated with additional data and information.

- Childhood Cancer Data Initiative (CCDI)
  - Updated case counts, case disease diagnosis information, and sample counts for Molecular Characterization Initiative (MCI).
- Cancer Genome Characterization Initiative (CGCI)
  - Updated case counts, case disease diagnosis information, and sample counts for Burkitt Lymphoma Genome Sequencing Project (BLGSP).
  - **New dataset** - HIV+ Tumor Molecular Characterization Project - Cervical Cancer
- Pediatric MATCH
- Added additional Clinical Trial Identifier.
- National Childhood Cancer Registry Explorer
  - 'National Childhood Cancer Registry Explorer' dataset was moved to the CCDI resource.

General Site Updates

- The CCDC Submission Template file, available on the About CCDI Data Catalog page, has been updated with new Resource Type, Biorepository, and a new Data Content Type, Biospecimen. Additionally, the 'Repository' Resource Type has been updated to be 'Data Repository.'
- The Glossary has been updated with new acronyms and abbreviations.
- The User Guide is updated to reflect new and updated resource information.

Participating Resources

- Users can now filter by the new Resource Type 'Biorepository.'
- In the filter, the 'Repository' Resource Type has been updated to be 'Data Repository.'

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

Celebrating Data Access

DATE OF RELEASE: JULY 19, 2023

This update includes the addition of two new analytic tools—the *Cancer Research Institute (CRI) iAtlas* and *The Cancer Proteome Atlas (TCPA)*—and the addition of one new repository—the *Childhood Cancer Repository*. The CRI iAtlas is an interactive web platform that provides a set of analytic tools for studying interactions between tumors and the immune microenvironment. The TCPA provides a data portal for users to access and interact with proteomics datasets. The Childhood Cancer Repository banks and distributes validated cell lines and patient-derived xenografts (PDXs) established from childhood cancers to investigators seeking to do research. Additionally, three existing resources have been updated to include new participant and sample count information.

This update also includes a new guide providing information about how to access, query, and process data from the Childhood Cancer Data Initiative (CCDI) stored at the NCI's Cancer Data Service (CDS). The CCDI studies that submit data to the CDS are registered with the National Center for Biotechnology Information's database of Genotypes and Phenotypes (dbGaP), which maintains a list of the subject IDs, sample IDs, and consents.

Explore the data and site updates in more detail below.

Data Updates

New Participating Resource and Dataset

The CCDC has added **3** new catalog resources.

- Cancer Research Institute (CRI) iAtlas
- Childhood Cancer Repository
- The Cancer Proteome Atlas (TCPA)

Existing Participating Resources and Datasets

3 existing resources have been updated with additional data and information.

- St. Jude Cloud
  - Updated case counts, case disease diagnosis information, and sample counts for multiple datasets
- Therapeutically Applicable Research to Generate Effective Treatments (TARGET)
  - Updated case counts, case disease diagnosis information, and sample counts for multiple datasets
- Patient-Derived Xenograft and Advanced In Vivo Models (PDX-AIM)
  - Updated case counts, case disease diagnosis information, and sample counts

General Site Updates

- The 'CCDI Studies' menu bar item has been updated to include both the existing link to the CCDI resource page and a new link to a guide for accessing CCDI data

  - The new 'CCDI Resource & Datasets' submenu item now provides a direct link to the CCDI Resource page
  - The new ‘Accessing CCDI Data’ submenu item links to a PDF guide that provides information about how to access, query, and process data from the CCDI stored at the NCI’s Cancer Data Service (CDS).
- The Glossary has been updated with new acronyms and abbreviations.
- The User Guide is updated to reflect new and updated resource information.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact the Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

Flagging New Datasets

DATE OF RELEASE: JUNE 14, 2023

This update includes the addition of the CancerModels.Org catalog resource. CancerModels.Org is a free, open-source cancer research platform that aggregates clinical, genomic, and functional data from patient-derived xenografts, organoids and cell lines. The resource currently has over 7,000 patient-derived cancer models available for the cancer community. Additionally, 7 existing resources have been updated to include 13 new datasets, 8 of which come from the Single-cell Pediatric Cancer Atlas Portal (ScPCA).

Explore the data and site updates in more detail below.

Data Updates

New Participating Resource and Dataset

The CCDC has added **1** new catalog resource.

- CancerModels.Org

Existing Participating Resources and Datasets

7 existing resources have been updated with additional data and information, including **13** new datasets.

- Childhood Cancer Data Initiative (CCDI)
  - **New dataset -** Molecular Characterization across Pediatric Brain Tumors and Other Solid and Hematologic Malignancies for Research, Diagnostic, and Precision Medicine
  - Updated case counts, case disease diagnosis information, and sample counts for Molecular Characterization Initiative dataset
- The database of Genotypes and Phenotypes (dbGaP)
  - **New dataset** – Detection and Targeting of Splicing Deregulation in Pediatric Acute Myeloid Leukemia Stem Cells
  - **New dataset** – INCLUDE: The Epidemiology of Transient Leukemia in Newborns with Down Syndrome
  - **New dataset** – Structurally Complex Osteosarcoma Genomes Exhibit Limited Heterogeneity within Individual Tumors and across Evolutionary Time
- Genomic Data Commons (GDC)
  - Updated Clinical Proteomic Tumor Analysis Consortium (CPTAC) dataset to include a link to the ProTrack data portal.
- Population-based Research to Optimize the Screening Process (PROSPR)
  - Updated case counts, case disease diagnosis information, and sample counts for PROSPR 1 Breast Cancer Public Use Dataset.
- Single-cell Pediatric Cancer Atlas Portal (ScPCA)
  - **New dataset** – Delineating pediatric brain tumor progression using single-nuclei sequencing

    - **New dataset** – Profiling the transcriptional heterogeneity of diverse pediatric solid tumors – Ewing sarcoma
    - **New dataset** – Profiling the transcriptional heterogeneity of diverse pediatric solid tumors – Non-rhabdomyosarcoma soft tissue sarcomas
    - **New dataset** – Profiling the transcriptional heterogeneity of diverse pediatric solid tumors – Other solid tumors
    - **New dataset** – Profiling the transcriptional heterogeneity of diverse pediatric solid tumors – Retinoblastoma
    - **New dataset** – Profiling the transcriptional heterogeneity of diverse pediatric solid tumors – Rhabdoid tumor
    - **New dataset** – Profiling the transcriptional heterogeneity of diverse pediatric solid tumors – Wilms tumor
    - **New dataset** – Single Cell Profiling of Early T cell Precursor Acute Lymphoblastic Leukemia
- St. Jude Cloud
    - **New dataset** – Pediatric Cancer Knowledge Base (PeCan)
- Victorian Paediatric Cancer Consortium (VPCC)
    - Updated case counts, case disease diagnosis information, and sample counts for Childhood Cancer Model Atlas dataset.

General Site Updates

- The Glossary has been updated with new acronyms and abbreviations.
- The User Guide is updated to reflect new and updated resource information.

About

The About page has a new banner image.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

May the Data Be with You

DATE OF RELEASE: MAY 17, 2023

The National Cancer Institute is pleased to announce an update to the Childhood Cancer Data Catalog website: https://datacatalog.ccdi.cancer.gov/.

This update includes the addition of the Cancer Dependency Map (DepMap) as a new analytic tool resource. The DepMap portal is an open access to analytical and visualization toolsets using broad panels of cancer models that represent the diversity of human cancers to identify and understand the landscape of cancer dependencies and create a resource for drug target and biomarker discovery. Additionally, 6 existing resources have been updated to included new count information.

Explore the data and site updates in more detail below.

Data Updates

New Participating Resource and Dataset

The CCDC has added **1** new analytic tool resource.

- Cancer Dependency Map

Existing Participating Resources and Datasets

6 existing resources have been updated with additional data and information.

- Genomic Data Commons (GDC)
  - Updated case counts, case disease diagnosis information, and sample counts for HCMI dataset.
- Human Cancer Models Initiative (HCMI)
  - Updated case counts, case disease diagnosis information, and sample counts for HCMI Participants Under 40 Years Old.
- Kids First Data Resource
  - Updated case counts and case disease diagnosis information for Pediatric Brain Tumor Atlas's Children's Brain Tumor Network (CBTN).
- PDX Development and Trial Centers Research Network (PDXNet)
  - Updated case counts and case disease diagnosis information for PDXNet Portal PDMR Data and PDXNet Portal Model datasets.
- Victorian Paediatric Cancer Consortium (VPCC)
  - Updated case counts, case disease diagnosis information, and sample counts for Childhood Cancer Model Atlas dataset.
- Xena Browser
  - Added Data Access information.

General Site Updates

- The Glossary has been updated with new acronyms and abbreviations.

- The User Guide is updated to reflect new and updated resource information.

Dataset Details

- ClinicalTrials.gov links have been updated from ‘Clinical Trial' to ‘Clinical Trial Identifier.’
- Dataset identifiers—Clinical Trial Identifier, dbGaP Study Identifier, GEO Identifier, and SRA Identifier—are now grouped together under the Additional Data Elements column.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

April Data Bring May Discoveries

DATE OF RELEASE: APRIL 19, 2023

The National Cancer Institute is pleased to announce an update to the Childhood Cancer Data Catalog website: https://datacatalog.ccdi.cancer.gov/.

This update includes the addition of the Xena Browser as a new analytic tool resource. Xena Browser is an online exploration tool that allows users to look at functional genomic data sets for correlations between genomic and/or phenotypic variables. Additionally, 8 existing resources have been updated to include 7 new datasets, 5 of which come from The Cancer Imaging Archive (TCIA).

Explore the data and site updates in more detail below:

Data Updates

New Participating Resource and Dataset

The CCDC has added **1** new analytic tool resource.

- Xena Browser

Existing Participating Resources and Datasets

8 existing resources have been updated with additional data and information, including **7** new datasets.

- Central Brain Tumor Registry of the United States (CBTRUS)
  - **New dataset** - CBTRUS Fact Sheet 2022
- Clinical Interpretation of Variants in Cancer (CIViC)
  - Added case disease diagnosis information
- The database of Genotypes and Phenotypes (dbGaP)
  - **New dataset** - NSD2 E1099K Drives Relapse in Pediatric Acute Lymphoblastic Leukemia by Disrupting 3D Chromatin
- The Jackson Laboratory PDX Models
  - Updated case counts
- Kids First Data Resource
  - Updated case counts and case disease diagnosis information for Pediatric Brain Tumor Atlas's Children's Brain Tumor Network (CBTN) and Pacific Pediatric Neuro-Oncology Consortium (PNOC) datasets
- OncoKB
  - Added case disease diagnosis information
- St. Jude Cloud
  - **New dataset** - St. Jude LIFE Hematopoiesis
  - Removed Sickle Cell Genome Project
  - Updated case count, case disease diagnosis, and sample count information across multiple datasets
- The Cancer Imaging Archive (TCIA)

- **New dataset** - Annotations for Combination Chemotherapy and Radiation Therapy in Treating Young Patients With Newly Diagnosed Hodgkin Lymphoma (AHOD0831-Tumor-Annotations) - TCIA DOIs - Cancer Imaging Archive Wiki
- **New dataset** - Annotations for Combination Chemotherapy and Surgery in Treating Young Patients With Wilms Tumor (AREN0534-Tumor-Annotations) - TCIA DOIs - Cancer Imaging Archive Wiki
- **New dataset** - Annotations for Vincristine, Dactinomycin, and Doxorubicin With or Without Radiation Therapy or Observation Only in Treating Younger Patients Who Are Undergoing Surgery for Newly Diagnosed Stage I
- **New dataset** - Annotations for Combination Chemotherapy With or Without Radiation Therapy in Treating Young Patients With Newly Diagnosed Stage III or Stage IV Wilms Tumor (AREN0533-Tumor-Annotations) - TCIA DOIs
- **New dataset** - Radiation Therapy, Amifostine, and Chemotherapy in Treating Young Patients With Newly Diagnosed Nasopharyngeal Cancer (ARAR0331) - The Cancer Imaging Archive (TCIA) Public Access - Cancer Imaging A
- Added Clinical Trial information to multiple datasets

General Site Updates

- The Glossary has been updated with new acronyms and abbreviations.
- The User Guide is updated to reflect new and updated resource information.

Search Catalog

- Search Catalog exports no longer include errant database characters

Participating Resources

- Selecting an email point of contact for resource with multiple identified contacts will now only mail to the selected contact.
- Selecting a point of contact that links to a website will now open in a new tab and not in an email.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

New Data Springing Up

DATE OF RELEASE: MARCH 15, 2023

The National Cancer Institute is pleased to announce an update to the Childhood Cancer Data Catalog website: https://datacatalog.ccdi.cancer.gov/.

This update includes the addition of 3 new resources: All of Us, Greehey Children's Cancer Research Institute Xenograft & Cell-Lines Core, and the Surveillance, Epidemiology, and End Results (SEER) program. With these new resources and updates to the CCDI and dbGaP resources, the catalog has added 11 new datasets. Additionally, the Catalog release includes numerous updates to the data and information for 7 existing resources across multiple datasets.

Those looking to access CCDI data now have a new direct link to CCDI Studies in the menu bar.

Data Updates

New Participating Resource and Datasets

The CCDC has added **3** new resources that include **3** new datasets.

- All of Us
  - **New dataset** - All of Us
- Greehey Children's Cancer Research Institute Xenograft & Cell-Lines Core
  - **New dataset** - Pediatric Preclinical Testing Program
- Surveillance, Epidemiology, and End Results (SEER) Program
  - **New dataset** - Surveillance, Epidemiology, and End Results Program

Existing Participating Resources and Datasets

7 existing resources have been updated with additional data and information, including **8** new datasets.

- Childhood Cancer Data Initiative (CCDI)
  - **New dataset** – Clonal Evolution During Metastatic Spread in High-Risk Neuroblastoma
  - **New dataset** - Comprehensive Genomic Sequencing of Pediatric Cancer Cases (CMRI/KUCC)
  - Updated case counts and repository information for the Molecular Characterization Initiative
- The database of Genotypes and Phenotypes (dbGaP)
  - **New dataset** - Genomic Landscape of Pediatric Germ Cell Tumors
  - **New dataset** - Circulating Tumor DNA Sequencing Provides Comprehensive Mutation Profiling for Pediatric Central Nervous System Tumors
  - **New dataset** - RNA-Sequencing of B-Lymphoblastic Leukemia with Glucocorticoids and PI3K Delta Inhibition
  - **New dataset** - Targeted Long-Read Sequencing of the Ewing Sarcoma 6p25.1 Susceptibility Locus
  - **New dataset** - RB1 Loss Triggers Dependence on ESRRG in Retinoblastoma
  - **New dataset** - Circulating Tumor DNA in Intermediate Risk Rhabdomyosarcoma

    - Multiple datasets were updated to include a GEO Study Identifier
- Genomic Data Commons (GDC)
    - Updated case counts for multiple datasets
- MyPART
    - Updated Publications and clinical trial URLs in the MyPART dataset
- Oncogenomics
    - Updated case counts for multiple datasets
- Pediatric Cancer Data Commons (PCDC)
    - Updated case counts for multiple datasets
- Texas KidsCanSeq
    - Updated counts and an added dbGaP ID to the Texas KidsCanSeq dataset

General Site Updates

- A direct link to the Childhood Cancer Data Initiative resource was added to the menu bar
    - The ‘CCDI Studies’ link will navigate a user directly to the CCDI resource page
- Site elements have been updated with additional HTML tagging

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

Data is in the Air!

DATE OF RELEASE: FEBRUARY 15, 2023

The National Cancer Institute is pleased to announce the addition of Epidemiologic as a data content type to the Childhood Cancer Data Catalog website: https://datacatalog.ccdi.cancer.gov/. This new data type allows the Catalog to better categorize data relating to the study of the distribution and determinants of health-related states or events (including disease) in populations, and the application of this study to the control of diseases and other health problems. Both the Childhood Cancer & Leukemia International Consortium (CLIC) and the National Childhood Cancer Registry Explorer (NCCR) have been re-categorized to capture their inclusion of epidemiologic data.

The Catalog is also expanded to add 1 new resource, Fibrolamellar Registry, with 1 new dataset.

There are several small site improvements in this update.

Data Updates

New Data Content Type

The CCDC has added a new data content type 'Epidemiologic.'

- Childhood Cancer & Leukemia International Consortium (CLIC) resource is now categorized as epidemiologic
- The National Childhood Cancer Registry Explorer (NCCR) in now categorized as both clinical and epidemiologic

New Participating Resource and Datasets

The CCDC has added **1** new resource that includes **1** new dataset.

- Fibrolamellar Registry
  - **New dataset** - Fibrolamellar Registry

Existing Participating Resources and Datasets

8 existing resources have been updated to include the additional data and information.

- Childhood Cancer Data Initiative (CCDI)
  - Molecular Characterization Initiative
  - Added Case Disease Diagnosis, Number of Samples, Sample Analyte Type, Sample Is Normal, Sample Anatomic Type, and Sample Assay Method Core Data Elements
  - Updated case count information
  - OncoKids - NGS Panel for Pediatric Malignancies
  - Added Case Disease Diagnosis, Number of Samples, and Sample Analyte Type Core Data Elements
  - Updated case counts
- Childhood Cancer & Leukemia International Consortium (CLIC)

    - Updated the CLIC dataset name to ‘International Agency for Research on Cancer’ to better reflect the data available
- Gene Expression Omnibus (GEO)
    - ‘The Genomic Analysis of Medulloblastoma’ and the ‘The Genomic Complexity of Early T-Cell Progenitor Acute Lymphoblastic Leukemia’ datasets were moved to the dbGaP resource
- The database of Genotypes and Phenotypes (dbGaP)
    - Multiple datasets were updated to now include a GEO Study Identifiers
- Kids First Data Resource
    - Updated case counts for multiple datasets
    - Added Sample ID, Sample Assay Method, and Case Proband elements to multiple datasets
- MicroRNA Childhood Cancer Catalog (M3Cs)
    - Updated case counts and disease names
- PedcBioPortal for Integrated Childhood Cancer Genomics (PEDC)
    - Updated case counts and disease names
- Therapeutically Applicable Research to Generate Effective Treatments (TARGET)
    - Updated ALL Phase 2 dataset case counts

General Site Updates

- The Glossary has been updated with new acronyms and abbreviations.
- The Site Update page now includes icons for the Cell Lines and Epidemiologic Data Content Types.
- The User Guide is updated to reflect new and updated resource information.

Search Catalog

- The Card View cards, on the Search Catalog page, have been updated to allow functional links in the description.

Participating Resources

- Users can now filter by the new Data Content Type ‘Epidemiologic’

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

New Year, New Data!

DATE OF RELEASE: JANUARY 11, 2023

The National Cancer Institute is pleased to announce the addition of the Analytic Tool resource type to the Childhood Cancer Data Catalog website: https://datacatalog.ccdi.cancer.gov/. This new resource type allows the Catalog to capture any platform, methodology, framework or other software designed for the use of and interpretation of biomedical research data and expands its reach to connect with even more resources. For this initial 2023 release, we are adding 3 Analytic Tool resources with 8 new datasets – Cancer Genomic Cloud (CGC) (4), HitWalker2 (1), and Vizome (3).

The Catalog is also expanded to add 5 new resources with 38 new datasets - Gene Expression Omnibus (GEO) (25), Childhood Leukemia International Consortium (CLIC) (1), Population-based Research to Optimize the Screening Process (PROSPR) (3), Single-cell Pediatric Cancer Atlas Portal (ScPCA) (8), Victorian Paediatric Cancer Consortium (VPCC) (1).

There are several site improvements in this update, including a new dynamic chart to display Core Data Elements on the Dataset Details page.

Data Updates

New Resource Type and Datasets

The CCDC has added a new resource type, 'Analytic Tool' with **3** new resources and **8** new datasets.

- Cancer Genomics Cloud (CGC)
  - **New dataset** - CICERO - Algorithm
  - **New dataset** - NetBID - System biology pipeline
  - **New dataset** - RNAIndel – Indel prediction tool
  - **New dataset** - Teltale - Telomeric read tool
- HitWalker2
  - **New dataset** - HitWalker2 - Visualization tool
- Vizome - discovery platform
  - **New dataset** - BEAT AML
  - **New dataset** - BEAT AML 2.0
  - **New dataset** - Chronic neutrophilic leukemia (CNL)

New Participating Resource and Datasets

The CCDC has added **5** new resources that include **38** new datasets.

- Childhood Leukemia International Consortium (CLIC)
  - **New dataset** - Childhood Cancer & Leukemia International Consortium
- Gene Expression Omnibus (GEO)
  - **New dataset** - Bone morphogenetic protein-7 is a MYC target with pro-survival functions in childhood medulloblastoma
  - **New dataset** - Clear Cell Sarcoma of the Kidney

    - **New dataset** - Discovery of novel recurrent mutations and rearrangements in early T-cell precursor acute lymphoblastic leukemia by whole genome sequencing
    - **New dataset** - Distinctive microRNA signature of medulloblastomas associated with the WNT signaling pathway
    - **New dataset** - Early Relapse in ALL is identified by Time To Leukemia in NOD/SCID mice and is characterized by a gene signature involving survival pathways
    - **New dataset** - Expression data from Burkitt lymphoma cases
    - **New dataset** - Frequent driver mutations in histone H3.3 and chromatin remodeling genes in paediatric glioblastoma
    - **New dataset** - Gene expression analysis of primitive neuroectodermal tumors
    - **New dataset** - Gene expression data from glioblastoma tumor samples
    - **New dataset** - Gene expression data of glucocorticoid resistant and sensitive acute lymphoblastic leukemia cell lines
    - **New dataset** - Gene expression profiling of children affected by acute lymphoblastic leukemia
    - **New dataset** - Gene expression profiling of children affected by Alveolar Rhabdomyosarcoma (ARMS)
    - **New dataset** - Gene expression profiling of MYC-amplified medulloblastoma cell lines treated by JQ1, a BET bromodomain inhibitor
    - **New dataset** - Genome-wide SNP Profiling of 27 Neuroblastoma Cell Lines
    - **New dataset** - GRHL1 acts as a tumor suppressor in neuroblastoma and is negatively regulated by MYCN and HDAC3
    - **New dataset** - In vitro prednisolone resistance signature in MLL-rearranged infant ALL
    - **New dataset** - miR-483 overexpression in human sarcoma cell line MHH-ES-1
    - **New dataset** - MLL partner genes confer distinct biological and clinical signatures of pediatric AML, an AIEOP study
    - **New dataset** - Novel mutations target distinct subgroups of medulloblastoma
    - **New dataset** - Pediatric AML and Normal Bone Marrow
    - **New dataset** - Pediatric malignant germ cell tumors show characteristic transcriptome profiles
    - **New dataset** - Pediatric Sarcoma: Rhabdomyosarcoma & Ewing's Sarcoma
    - **New dataset** - The leukemia-specific fusion gene ETV6/RUNX1 perturbs distinct key biological functions primarily by gene repression
    - **New dataset** - Transcriptomic Profiling of 39 Neuroblastoma Cell Lines
    - **New dataset** - Transient treatment with epigenetic modifiers yields stable neuroblastoma stem cells resembling aggressive large-cell neuroblastomas
- Population-based Research to Optimize the Screening Process (PROSPR)
    - **New dataset** - PROSPR 1 Breast Cancer Screening Dataset
    - **New dataset** - PROSPR 1 Cervical Cancer Public Use Dataset
    - **New dataset** - PROSPR 2 Cervical Cancer Public Use Dataset
- Single-cell Pediatric Cancer Atlas Portal (ScPCA) – 8 Datasets
    - **New dataset** - Profiling the transcriptional heterogeneity of diverse pediatric solid tumors - Neuroblastoma
    - **New dataset** - Profiling the transcriptional heterogeneity of diverse pediatric solid tumors - Rhabdomyosarcoma
    - **New dataset** - Single cell RNA sequencing of pediatric high-grade gliomas

    - **New dataset** - Single cell RNA sequencing of pediatric low-grade gliomas
    - **New dataset** - Single nuclear RNA-seq and spatial transcriptomic analysis of anaplastic and favorable histology Wilms tumor
    - **New dataset** - Single-cell gene expression and cytosine modification profiling in pediatric central nervous system tumors
    - **New dataset** - Single-cell profiling of Acute Myeloid Leukemia for high-resolution chemo-immunotherapy target discovery
    - **New dataset** - Single-cell sequencing of acute lymphoblastic leukemia
- Victorian Paediatric Cancer Consortium (VPCC)
    - **New dataset** - Childhood Cancer Model Atlas

Existing Participating Resources and Datasets

4 existing resources have been updated to include the addition of **1** new dataset and several updates to existing datasets**.**

- Childhood Cancer Data Initiative (CCDI)
    - **New dataset** - OncoKids - NGS Panel for Pediatric Malignancies
- Clinical Interpretations of Variants in Cancer (CIViC)
    - Update Homepage URL
- Oncogenomics
    - Added dbGaP accession numbers to multiple datasets
- Pediatric Preclinical Testing Consortium (PPTC)
    - Update with additional Publications

General Site Updates

- The homepage text ‘What can you expect from the Data Catalog’ has been updated to remove text overlap.
- The breadcrumb navigation has been updated to have a more distinguished coloration
- Tooltips now display better on small windows.
- A header image has been added to the Document Search page.
- A new category, Image Type, has been added to the Glossary to better distinguish terms related to imaging. Additionally, the Glossary has been updated with new acronyms and abbreviations.
- The entries on the Site Update page now include an icon(s) to identify the Data Content Type includes in the update. These new icons convey information across all the newly added datasets at a quick glance.
- The User Guide is updated to reflect new and updated resource information.

Search Catalog

- The Search Catalog export was updated to include the following additional Core Data Elements on export
    - Case Gender, Sample Anatomic Site, Sample Composition Type, Sample is Normal, Sample is Xenograft

Dataset Details

- A new set of dynamic charts has been added to the Dataset Details page to display the available Core Data Elements. Each available core data element can now be displayed as a donut chart with age displayed as a histogram.
- Links in the dataset's Description are now functional.

Participating Resources

- Users can now filter by the new Resource Type 'Analytic Tool'
- The Resource Filter column now includes a clear button that clears all the selected fields in the filter and clear the navigation pane of filtered results.

Participating Resources Details

- Fixed an issue where dataset type bubbles were displaying incorrectly from the participating resource details page.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

52 New Catalog Datasets!

DATE OF RELEASE: NOVEMBER 17, 2022

The National Cancer Institute is pleased to announce the addition of the CCDI resource to the Childhood Cancer Data Catalog website: https://datacatalog.ccdi.cancer.gov/.

With the addition of the CCDI project (4) as well as updates to the dbGaP (46), GDC (1), and TCIA (1) resources the catalog now includes 52 new datasets. Additionally, there is now a site-wide scroll back to top button in the lower right-hand corner to improve site navigation.

Data Updates

New Participating Resource and Datasets

The CCDC has added **1** new resource that include **4** new datasets.

- Childhood Cancer Data Initiative (CCDI)
  - **New dataset** - NCI CCSG CCDI Supplement Additional Genomic Submission
  - **New dataset** - UCSF Database for the Advancement of JMML - Integration of Metadata with "Omic" Data
  - **New dataset** - Feasibility and Clinical Utility of Whole Genome Profiling in Pediatric and Young Adult Cancers
  - **New dataset** - Childhood Cancer Data Initiative (CCDI): Molecular Characterization Initiative

Existing Participating Resources and Datasets

7 existing resources have been updated to include the addition of **48** new datasets and numerous updates to existing datasets**.**

- The Cancer Imaging Archive (TCIA)
  - **New dataset** - Annotations for Chemotherapy and Radiation Therapy in Treating Young Patients with Newly Diagnosed, Previously Untreated, High-Risk Medulloblastoma/PNET (ACNS0332-Tumor-Annotations)
- Childhood Cancer Survivor Study (CCSS)
  - Updated Data Access link
- The database of Genotypes and Phenotypes (dbGaP)
  - **New dataset** - A Comprehensive Genomic Study of Pediatric Malignancy
  - **New dataset** - Analysis of Somatic Mutations in Pediatric AML FAB-M7 Subtype by Whole Transcriptome Sequencing
  - **New dataset** - Characterizing TP53 and PPM1D Mutations as Resistance Drivers to Radiation Therapy in Diffuse Intrinsic Pontine Gliomas
  - **New dataset** - Defining and Overcoming Intrinsic T Cell Dysfunction to Enable Pediatric Immunotherapy
  - **New dataset** - DNA Methylation Characterization of Fusion-Positive and Fusion-Negative Rhabdomyosarcoma
  - **New dataset** - Elucidating Transcription Regulation by Epigenetics in Neuroblastoma

- **New dataset** - Exome Sequencing of Childhood Wilms Tumor
- **New dataset** - Exome Sequencing of Pleuropulmonary Blastoma
- **New dataset** - Gabriella Miller Kids First Pediatric Research Program for Infantile Hemangiomas Associated with Multi-Organ Structural Birth Defects
- **New dataset** - Gene Variants in Pheochromocytoma and Paraganglioma
- **New dataset** - Genetic Underpinnings of Ethnic Disparities in Bone Toxicities Between Hispanic and Non-Hispanic Children Treated for Acute Lymphoblastic Leukemia
- **New dataset** - Genome-Wide Association Study of Relapse of Childhood Acute Lymphoblastic Leukemia
- **New dataset** - Genomic Analysis of Fibrolamellar Hepatocellular Carcinoma
- **New dataset** - Genomic Analysis of Pediatric Low Grade Gliomas
- **New dataset** - Genomic Characterization of Pediatric Low-Grade Gliomas
- **New dataset** - Genomic Profiling of Relapsed and Refractory Childhood Cancers
- **New dataset** - Genomic Sequencing of Ewing Sarcoma
- **New dataset** - Genomic Sequencing of Pediatric Rhabdoid Cancers
- **New dataset** - Genomics of Pediatric Renal Medullary Carcinomas
- **New dataset** - Germline and Somatic Genetic Landscape of Pediatric Rhabdomyosarcoma
- **New dataset** - Human Pilocytic Astrocytoma Single Cell RNA Sequencing
- **New dataset** - Hyperdiploid Acute Lymphoblastic Leukemia RNA-Seq
- **New dataset** - Identification of 22 Novel Loci Associated with Susceptibility to Testicular Germ Cell Tumors
- **New dataset** - Mechanisms of Chemotherapy Resistance in T-ALL
- **New dataset** - Mechanisms of Therapy Driven Clonal Evolution in Oncogenic RAS Mutant Relapsed Acute Lymphoblastic Leukemia
- **New dataset** - Medulloblastoma exome sequence analysis
- **New dataset** - Methotrexate Clearance GWAS in Acute Lymphoblastic Leukemia (ALL) Patients
- **New dataset** - Modelling Multi-Dimensional ClinOmics for Precision Therapy of Children and Adolescent Young Adults with Relapsed and Refractory Cancer: A report from the Center for Cancer Research
- **New dataset** - National Cancer Institute - Population Structure and Natural Selection in the Epidemiology of Burkitt Lymphoma in East African Children and Minors (EMBLEM) study in Uganda
- **New dataset** - Neuroblastoma Genome-Wide Association Study
- **New dataset** - Next generation sequencing of diffuse intrinsic pontine glioma samples to identify recurrent mutations, variations, and expression patterns to define novel therapies
- **New dataset** - Pathogenesis and Immunity in Endemic Burkitt Lymphoma
- **New dataset** - Relapsed Acute Lymphoblastic Leukemia (ALL): Mutational Landscape
- **New dataset** - SLCO1B1 Variants and Methotrexate Clearance
- **New dataset** - Study of Tumor Recurrence Related to the Expression of the PAX3-FOXO1 Oncogenic Transcription Factor in Fusion-Positive Rhabdomyosarcoma
- **New dataset** - The Genetic Basis of Hypodiploid ALL
- **New dataset** - The Genomic Analysis of Medulloblastoma

    - **New dataset** - The Genomic Complexity of Early T-Cell Progenitor Acute Lymphoblastic Leukemia
    - **New dataset** - The genomic complexity of sporadic and inherited retinoblastoma with a matched orthotopic xenograft
    - **New dataset** - The genomics of pilocytic astrocytoma formation in neurofibromatosis type 1
    - **New dataset** - The Institute for Genomic Medicine at Nationwide Children's Hospital Pediatric Cancer and Blood Disorder Project
    - **New dataset** - The UC San Diego Chronic Lymphocytic Leukemia (CLL) Study
    - **New dataset** - Transcriptome Sequencing of Pediatric Neuroblastoma
    - **New dataset** - Whole Exome Sequencing of Craniopharyngioma Tumors at Human Genome Sequencing Center, Baylor College of Medicine
    - **New dataset** - Whole genome sequencing of core-binding factor leukemia
    - **New dataset** - Whole-exome Sequencing of Intracranial Germ Cell Tumors performed at Human Genome Sequencing Center, Baylor College of Medicine
- Genomic Data Commons (GDC)
    - **New dataset** - MP2PRT: Identification of Genetic Changes Associated with Relapse and/or Adaptive Resistance in Patients Registered as Favorable Histology Wilms Tumor on AREN03B2
    - Updated dataset – Beat AML
    - Updated dataset – The Cancer Genome Atlas (TCGA)
    - Updated dataset – Clinical Proteomic Tumor Analysis Consortium (CPTAC)
    - Updated dataset – Therapeutically Applicable Research to Generate Effective Treatments (TARGET)
- Kids First
    - Pediatric Brain Tumor Atlas: CBTN
    - Updated Data Repository links
- Pediatric Cancer Data Commons
    - International Soft Tissue Sarcoma Consortium (INSTRuCT)
    - Updated Project titles
- Texas KidsCanSeq
    - Updated the description

General Site Updates

- The CCDC site has been updated with a scroll back to top button in the lower right-hand corner. This new button will take users to the top of the page if selected.
- The Glossary has been updated with new acronyms and abbreviations.
- The User Guide is updated to reflect new and updated resource information.

Search Catalog

- Removed ‘Case ID’ from the ‘Projects’ field on Dataset Details page. This text was a relic of digest data entry.

Participating Resources

- Updated the search cards on the Participating Resource search page so that the ‘external link’ icon will appears on the same line as the link and not the following.
- Updated the Participating Resource Details page to allow multiple links in the Data Access field.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

New Resource: dbGaP

DATE OF RELEASE: OCTOBER 18, 2022

The National Cancer Institute is pleased to announce the additional of the dbGaP resource to the Childhood Cancer Data Catalog website: https://datacatalog.ccdi.cancer.gov/.

This addition includes six new datasets and the re-organization of two existing datasets into the new dbGaP resource. Additionally, CCDC Submission Template glossary has been updated to better assist those looking to submit additional resources.

Data Updates

New Participating Resource and Datasets

The CCDC has added **1** new resource that include **6** new datasets.

- The database of Genotypes and Phenotypes (dbGaP)
  - Osteosarcoma Genomics (OG)
  - Genomic Sequencing of Ewing's Sarcoma (ES)
  - Genomic Sequencing of Pediatric Rhabdomyosarcoma (RMS)
  - University of Michigan Clinical Sequencing Exploratory Research (CSER)
  - Genomic and Transcriptomic Landscape of Fibrolamellar Hepatocellular Carcinoma (FL-HCC)
  - Functionally-defined Therapeutic Targets in Diffuse Intrinsic Pontine Glioma (DIPG)

Existing Participating Resources and Datasets

3 resources have been updated and **2** resources have been removed and their datasets have been moved to the dbGaP resource.

- Cancer Genome Characterization Initiative (CGCI)
  - Multiple Datasets
  - Updated dbGaP study accession information
- Genomic Data Commons (GDC)
  - Multiple Datasets
  - Updated dbGaP study accession information
- Human Tumor Atlas Network (HTAN)
  - Center for Pediatric Tumor Cell Atlas - Children's Hospital of Philadelphia dataset
  - Updated dbGaP study accession information
- Removed: The Genomic Landscape of Tuberous Sclerosis Complex (TSC)
  - The Genomic Landscape of Tuberous Sclerosis Complex dataset
  - Moved to dbGaP resource
- Removed: Sequence Read Archive (SRA)
  - Baylor College of Medicine Advancing Sequencing in Childhood Cancer Care dataset
  - Moved to dbGap resource

General Site Updates

- The CCDC Submission Template file, available on the About CCDI Data Catalog page, has been updated with new definitions on the Glossary tab.
- Fixed date typo on Site Updates page for the 1.0 release.
- The Glossary has been updated with new acronyms and abbreviations.
- The User Guide was updated with new and removed resource information.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

New Data & Enhanced Search

DATE OF RELEASE: SEPTEMBER 15, 2022

The National Cancer Institute is pleased to announce an update to the Childhood Cancer Data Catalog website: https://datacatalog.ccdi.cancer.gov/.

This latest update to the site includes 19 new datasets and updates to 24 of our existing participating resources. The site now features a new site update widget on the homepage and a Site Update page dedicated to tracking changes to site data and features. Additionally, the Search Catalog was updated to enhance search clarity and usability.

Data Updates

New Participating Resources and Datasets

The CCDC has added **5** new resources that include **5** new datasets.

- Individualized Cancer Therapy Study (iCAT)
  - Individualized Cancer Therapy Study
- International Cancer Genome Consortium (ICGC)
  - Pediatric Brain Tumor Project
- The Genomic Landscape of Tuberous Sclerosis Complex (TSC)
  - The Genomic Landscape of Tuberous Sclerosis Complex
- MicroRNA Childhood Cancer Catalog (M3C)
  - MicroRNA Childhood Cancer Catalog
- Molecular Targets Platform
  - Molecular Targets Platform

Existing Participating Resources and Datasets

24 existing resources have been updated to include the addition of **14** new datasets and numerous updates to existing datasets.

- Childhood Cancer Survivor Study (CCSS)
  - Childhood Cancer Survivor Study dataset
  - Updated publication links
  - Updated data repository link
- Cancer Genome Characterization Initiative (CGCI)
  - Multiple Datasets
  - Updated publications links
  - Added and updated data repository links
- Clinical Interpretations of Variants in Cancer (CIViC)
  - Clinical Interpretations of Variants in Cancer dataset
  - Updated Publications link
- Children's Oncology Group (COG)

    - Children's Oncology Group dataset
    - Removed publications links
    - Added clinical trials links
- Genomic Data Commons (GDC)
    - **New dataset** - Radiation-related Genomic Profile of Papillary Thyroid Cancer after the Chernobyl Accident
    - Multiple Datasets
    - Added publication links
    - Added data repository links
- Human Cancer Models Initiative (HCMI)
    - HCMI Participants Under 40 Years Old dataset
    - Updated data repository link
    - Added publications link
- Human Tumor Atlas Network (HTAN)
    - Center for Pediatric Tumor Cell Atlas - Children's Hospital of Philadelphia dataset
    - Updated publications link
    - Added data repository link
- The Jackson Laboratory PDX Models (JAX PDX)
    - Mouse Models of Human Cancer database
    - Updated publications link
    - Added data repository link
- Kids First
    - Multiple Datasets
    - Updated dataset description
    - Updated publication links
    - Added links to dbGaP study accessions
- My Pediatric and Adult Rare Tumor network (MyPART)
    - MyPART - My Pediatric and Adult Rare Tumor Network dataset
    - Updated publications link
- National Childhood Cancer Registry Explorer (NCCR)
    - National Childhood Cancer Registry Explorer dataset
    - Removed publication links
    - Added clinical trials links
- Oncogenomics
    - **New dataset** - TMB_Immune_Landscape_Glioma
    - Multiple datasets
    - Updated dataset description
    - Updated publication links
    - Added data repository links
- Pediatric Cancer Data Commons (PCDC)
    - Multiple datasets
    - Updated publications links
    - Added data repository links

- PDX for Childhood Cancer Therapeutics (PCAT)
  - PDX for Childhood Cancer Therapeutics dataset
  - Updated publications link
  - Added data repository link
- Patient-Derived Xenograft and Advanced In Vivo Models (PDX AIM)
  - Patient-Derived Xenograft and Advanced In Vivo Models dataset
  - Added data repository link
- PDX Development and Trial Centers Research Network (PDXNet)
  - Multiple Datasets
  - Added publications links
  - Added data repository links
- PedcBioPortal for Integrated Childhood Cancer Genomics (PEDC)
  - PedcBioPortal for Integrated Childhood Cancer Genomics datset
  - Added data repository link
- Pediatric Preclinical Testing Consortium (PPTC)
  - Pediatric Preclinical Testing Consortium dataset
  - Updated publications link
  - Added link to dbGaP study accession
- Sequence Read Archive (SRA)
  - Baylor College of Medicine Advancing Sequencing in Childhood Cancer Care dataset
  - Added publications link
  - Added link to dbGaP study accession
- St. Jude Cloud
  - **New dataset** - Childhood Solid Tumor Network (CSTN)
  - **New dataset** - Sickle Cell Genome Project (SGP)
  - **New dataset** - Pan-Acute Lymphoblastic Leukemia (PanALL)
  - **New dataset** - Pediatric Therapy-related Myeloid Neoplasms (tMN)
  - **New dataset** - Pediatric Acute Myeloid Leukemia (PedAML)
  - **New dataset** - Pediatric Brain Tumor Program (PBTP)
  - **New dataset** - Genomics and transcriptomics of relapsed pediatric AML (RPAML)
  - Multiple Datasets
  - Updated publications links
  - Added data repository links
- Therapeutically Applicable Research to Generate Effective Treatments (TARGET)
  - Multiple Datasets
  - Added links to dbGaP study accessions
  - Added publication links
  - Added data repository links
- The Cancer Imaging Archive (TCIA)
  - **New dataset** - Combination Chemotherapy and Radiation Therapy in Treating Young Patients With Newly Diagnosed Hodgkin Lymphoma (AHOD0831)
  - Multiple Datasets
  - Updated publications links

    - Added data repository links
- Texas KidsCanSeq
    - Texas KidsCanSeq dataset
    - Added publications link
- Treehouse Childhood Cancer Initiative
    - **New dataset** - Cell Line Compendium v2 (Decemember 2019)
    - **New dataset** - Patient-Derived Xenograft Compendium PolyA v22.03 (March 2022)
    - **New dataset** - Patient-Derived Xenograft Compendium Ribodeplete v22.03 (March 2022)
    - **New dataset** - Tumor Compendium v9 Public Ribodeplete (March 2019)
    - Multiple Datasets
    - Updated publications links
    - Added data repository links

General Site Updates

- A new Featured Items widget has been added to the homepage. The new widget highlights site changes and shares information related to the CCDI.
- A new Site Updates page, available under the About menu, was added to share information on site data and feature changes.
    - Site updates are listed in chronological order from newest to oldest.
    - Each update appears as a scrollable entry listing site updates and changes.
    - Updates can be exported as a PDF.
- The site header and menu bar have been updated to float at the top of the site pages.
- External links, links that navigate away from https://datacatalog.ccdi.cancer.gov/domain, are now marked with an icon and will open in a new tab or window.
- Site free text search fields (Search Catalog & Documentation Search) now include a clear icon (‘X’) that will clear the field of all typed text. Note: This icon will not clear or reset a search. The “X” clears the search terms from the search field allowing data entry of different text.
- The site tooltips were updated to address a rare issue where the definition would obscure the word being defined.
- The Homepage carousel now includes all available resources on the site (up from 10). These resources will automatically advance every few seconds.
- Homepage text was updated to better reflect the information available on the site
- The Documentation Search page no longer includes a pagination bar when one is not needed.
- The Glossary has been updated with new acronyms and abbreviations.
- The User Guide file name and URL have been updated to be the document name.

Search Catalog

- The catalog search was enhanced and expanded to search all data fields within a dataset. The additional searched fields will appear on the Card View under the ‘Other Match’ field.
- The Card View display has been updated for new visual emphasis and search clarity.
    - Searched terms now appear with a blue highlight in addition to bold emphasis.
    - The tan highlighting was removed from Case Disease Diagnosis.
    - Color emphasis was added to the Case Count (blue) and the Sample Count (green).

    - Hyperlinks are now functional.
    - Project information will now appear under ‘Other Match’ and not it’s own field on the card display
- Fixed an issue affecting the csv export not correctly exporting special characters, like apostrophes.
- Fixed two navigation issues where the pagination bar would change size when advancing through results and an issue where the color of the Results per Page dropdown did not match the site.
- The Dataset Details page has been updated to enhance data presentation.
    - Long project names will now display with an adjusted font size to not overwhelm the header
    - Case Disease Diagnosis will now appear in mixed case.
    - The Additional Data Elements section has been re-arranged to appear in alphabetical order.
    - Grant ID and Grant Name have been combined into a single Grant Information table to better associate the ID and the name.

Participating Resources

- The Research Description filters have been updated so that both the checkbox and label text are clickable to filter the resources.
- The Data Content Type filter was updated to include only currently available types.
- The dataset cards on the Participating Resource Details page have been updated to include Case Disease Diagnosis.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry.

CCDC 1.1 Release!

DATE OF RELEASE: JUNE 16, 2022

The National Cancer Institute is pleased to announce an update of the Childhood Cancer Data Catalog website.

This latest update to the site includes changes to support mobile browsing, improved accessibility, enhancement of site search tools, and new and updated resource data, including a new resource type, *Knowledgebase*.

General

- Elements of responsive design have been incorporated into the site to improve small screen and mobile viewing experience.
- Color contrast across the site has been increased to improve accessibility and consistency.
- Users navigating to a page that does not exist on the site (404 error) will now be notified and given direction to return to the home page.
- The site vertical scroll bar has been updated to match the site design from the previous browser default.
- The About page was updated with expanded information about the CCDC's aim of connecting users to data resources.
- The Glossary was updated with new acronyms and abbreviations.

Search Catalog

- *Resource* has been added as an additional filter option.
  - Users can now select a resource(s) in the left-hand column to limit results to a specific resource or set of resources.
  - Selecting multiple resources functions with the OR Boolean operator
  - Resource and text searches work together as an AND Boolean search.
- Results sorting and display have been improved and expanded with additional user customization options.
  - In Card View, the Sort By filter has been expanded to include sort by *Case* and *Sample* counts.
  - Card View results can now be sorted in ascending and descending order by selecting two new icons to the right of the Sort By filter.
  - In Table View, all column headers are now selectable for sorting in ascending and descending order.
  - Displayed results can now be adjusted to be 10, 20, 50, or 100 results per page by selecting the desired display value in the Results per Page filter
  - Forward and backwards navigation of paginated results is now done using arrows at the ends of the pagination bar and not 'Previous' or 'Next' buttons.
- Anatomical site searches now leverage the NCI Thesaurus to display synonym matches for the Case Tumor Site data element in addition to matches of the searched term.

Participating Resources

- *Knowledgebase* has been added as an additional Resource Type.
  - Knowledgebase - Biomedical knowledgebases extract, accumulate, organize, annotate, and link the growing body of information that is related to and relies on core datasets.
- Each participating resource now includes information indicating if the resource is pediatric specific or contains mixed adult and pediatric data.
- When viewing and filtering participating resources, the results display has been improved and expanded.
  - Results are now paginated and can be navigated by selecting the forwards or backwards arrows.
  - Displayed results can be adjusted to be 10, 20, 50, or 100 results per page by selecting the desired display value in the Results per Page filter

Data Updates

New Participating Resources and Datasets

The CCDC has added 7 new resources that include 8 new datasets.

- Human Cancer Model Initiative
  - HCMI Participants Under 40 Years Old
- Clinical Interpretations of Variants in Cancer (CIViC)
  - Clinical Interpretations of Variants in Cancer
- OncoKB
  - OncoKB
- Central Brain Tumor Registry of the United States (CBTRUS)
  - CBTRUS Fact Sheet 2021
- Patient-Derived Xenograft and Advanced In Vivo Models (PDX-AIM)
  - Patient-Derived Xenograft and Advanced In Vivo Models
- PDX Development and Trial Centers Research Network (PDXNet)
  - PDXNet Portal PDMR Data
  - PDXNet Portal Model
- The Jackson Laboratory PDX Models (JAX PDX)
  - Mouse Models of Human Cancer database

Updated Participating Resources

Two existing resources have been updated to include the addition of 2 new datasets.

- St. Jude Cloud – Updated Case counts
- The Cancer Imaging Archive
  - New - Clinical Trial NCT00352534
  - New - Clinical Trial NCT00379340

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with the submitted inquiry

CCDC 1.0 Release!

DATE OF RELEASE: MAY 2, 2022

The Childhood Cancer Data Catalog (CCDC) is a new resource sharing website developed as part of the National Cancer Institute's (NCI) Childhood Cancer Data Initiative (CCDI). The CCDC is an inventory of pediatric oncology data resources which includes childhood cancer repositories, registries, data commons, web sites, as well as other catalogs that either manage or refer to pediatric cancer data.

The site currently includes 71 unique datasets from 21 different identified participating resources. These datasets represent almost 250,000 participants and 275,000 biological samples.

The initial site release includes the following pages and features:

- Home page
- Search Catalog page
  - Dataset Details page
- Participating Resources page
  - Participating Resource Details page
- About
- Glossary
- Document search

The aim of the CCDC is to help researchers, clinicians, and citizen scientists learn about existing pediatric resources for the development of new biomedical hypothesis, formation of new secondary analysis of data within existing resources, and to provide connections to existing pediatric oncology research sites.

Home page

The Home page is the landing page for users navigating to the site. It provides a brief introduction to the site, allows users to perform a search of the cataloged data resources, and shares a limited number of participating resources available on the site. The home page features a rotating carousel of participating resources available on the site that users can navigate.

Search Catalog Page

The Search Catalog page allows users to search the 71 individual datasets cataloged within the CCDC. A free text search allows users to filter datasets and review introductory information for each dataset. Additional information about each dataset is further available.

The catalog currently includes the following types of datasets.

- **Collection** - A group of datasets collected for any reason by an organization of researchers, stewards, or stakeholders either pertaining to a common theme or for a common purpose.
- **Program** - A coherent assembly of plans, project activities, and supporting resources contained within an administrative framework, the purpose of which is to implement an organization's mission or some specific program-related aspect of that mission.

- **Project** - Any specifically defined piece of work that is undertaken or attempted to meet the goals of a program and that involves one or more case studies. Also known as a Study or Trial.

Each catalog search results can be exported as a comma-separated values (.csv) file for local manipulation or record keeping. These export files contain all the information and data elements for a dataset that has been gathered for the CCDC.

Dataset Details Page

Each dataset has a dedicated page containing a listing of all metadata the CCDC site has collected about that dataset. These pages contain both administrative information as well as count and summary data. Administrative information, such as point of contact, is available for further exploration of a dataset.

Summary data for each dataset is broken down into either core or additional data elements. Core data elements describe and provide count information about data within the dataset. Additional Data Elements provide supporting information about a dataset.

The following core data elements are displayed for each dataset if available:

- Number of Cases
- Case Sex
- Case Age at Diagnosis
- Case Race
- Case Ethnicity
- Case Disease Diagnosis
- Case Tumor Site
- Case Treatment Administered
- Case Treatment Outcome
- Number of Samples
- Sample Assay Method
- Sample Analyte Type

The following additional data elements are displayed for each dataset if available:

- Clinical Trial
- Data Repository
- Grant ID
- Grant Name
- Projects
- Project ID
- Published In

Participating Resource Page

The Participating Resource page allows users to view and filter the 21 resources that CCDC dataset are drawn from. The resource page includes introductory information for each resource available on the site along with a link to view a more detailed information. Resources on the page can be filtered by ‘Resource Type’ and by ‘Data Content Type’ to view targeted resources.

The catalog currently includes the following types of resources.

- **Catalog** - A data catalog is not a data repository but rather a place where data is described with an index to what is available. A collection of digests and references (e.g., URL or POC) to corresponding research artifacts. There is a consistent structure across the collection of digests to facilitate filtering and identifying research artifacts of interest. A catalog contains some combination of Summary Research Data, Summary Clinical Data, Data Overview, and Resource Metadata.
- **Program** - A coherent assembly of plans, project activities, and supporting resources contained within an administrative framework, the purpose of which is to implement an organization's mission or some specific program-related aspect of that mission.
- **Registry** - A cancer registry is an information system designed for the collection, storage, and management of data on persons with cancer. An inventory of individuals or samples, usually focused on a specific diagnosis or condition. In some cases, public health laws require collecting information in registries about individuals who have a specific disease or condition. In other cases, individuals provide information about themselves to these registries voluntarily. Thus, a registry contains Individual Clinical Data, but not Individual Research Data
- **Research Data Repository** - Biomedical data repositories accept submission of relevant data from the community to store, organize, validate, archive, preserve and distribute the data, in compliance with the FAIR Data Principles. A system for storing multiple research artifacts, provided at least some of the research artifacts contain Individual Research Data. A data repository often contains artifacts from multiple studies. Some data repositories accept research datasets irrespective of the structure of those datasets; other data repositories require all research datasets to conform to a standard reference model.

Participating Resource Detail Page

For each participating resource has a page of detailed information about that resource. The Participating Resource Details page contains a listing of metadata the CCDC site has collected about a resource as administrative information, descriptive information, and a listing associated datasets.

The administrative data contains the name of the dataset, a link to the resources own data sharing website, and Point of Contact information for the dataset. The descriptive information about the resource includes a resource description, information on a resource's own analysis tools, information on data type of available data, and information on accessing data. Each resource includes a listing of all associated dataset available on the CCDC site.

About CCDI Data Catalog Page

The CCDC About page describes the CCDC and provides information on engaging with CCDI and contributing to the CCDC. The CCDC team is continually looking to expand and improve the inventory of pediatric oncology data resources on the CCDC site. Users with knowledge of additional resources are invited to share that knowledge with the CCDI team, via NCIChildhoodCancerDataInitiative@mail.nih.gov, and contribute to the advancement of the CCDC. Users are also invited to join the CCDI mailing list.

Glossary Page

The CCDC Glossary page provides a listing of terms and abbreviations used on the CCDC site. Each glossary term will include a definition and categorization and when available will also include a reference and reference URL.

Documentation Search Page

The Document Search is a free-text search tool that will search across the three static CCDC site pages - Home page, About CCDI Data Catalog, and the Glossary. User can use the search feature to search the site for a topic of interest.

Additional Support and Inquiries

Users requiring any additional support or with any questions about the CCDC can contact Childhood Cancer Data Initiative at NCIChildhoodCancerDataInitiative@mail.nih.gov. Please include a name and a reference to the CCDC with submitted any inquiry.
